When its a Lacombe Milling Co., Product, its the Farmer's Forum

Commencing This Week and Continuing Until the End of February, Stores of Lacombe will Close Saturdays at 7 p.m.

Woodmen Now Fifty Years of Age

Modern Woodmen of America to Celebrate Its Golden Anniversary.

Because of the thousands upon thousands of human lives with which it has made contacts of the sort which have stabilized the institution of the home, making financial resources immediately available to the widow and children of its deceased members, the passing of the fiftieth milestone on January 6, 1933, by Modern Woodmen of America, the World's Largest Fraternal Insurance Society, is regarded by multitudes of people throughout the Dominion of Canada and the United States as an event of great importance and significance.

The meaning of this golden anniversary becomes at once apparent when it is stated that this largest of all fraternal insurance societies with insurance reaching the tremendous aggregate of nearly one billion dollars, estimated to be one-hundredth of the total insurance in force within the United States, has paid during the fifty years of its continuous existence, 356,000 death and disability claims amounting to more than $505,520,000. To this must be added not less than $8,000,000 for voluntary financial relief extended to members and their families through local and general efforts and Head Camp action in times of flood, earthquake, fire, and other calamities.

The official records of the Society present vivid contrasts and they attest to remarkable growth. For example, by the end of 1884 there was a total membership of only 1272, distributed among seventy-six Camps. Today the Camps of the Society number nearly twelve thousand. The society looks back upon an uninterrupted career, in the course of which from humble beginnings, it has built up for itself a reputation for stability, soundness, and safety, that in no small degree is responsible for the confidence reposed in it for many long years, as well as for its unprecedented growth.

One way of realizing the time that has passed since the Society began issuing insurance certificates is to recall the fact that it started in business when Chester A. Arthur occupied the presidential office as the successor to James A. Garfield who had been stricken down by the hand of an assassin. Through the administrations of Presidents Cleveland, Harrison, McKinley, Roosevelt, Taft, Wilson, Harding, Coolige and Hoover, Modern Woodmen of America has successfully pursued its way.

The institution which, in the town of Lyons, Iowa, back in 1883, began its existence with but twenty-one Charter members, and which originally operated in only six states, and in a period which antedated the motor age, and the era of the airplane, the dirigible, the radio, and the motion picture, has branched out like a great tree with a jurisdiction which covers the entire United States (except Massachusetts) and four provinces of the Dominion of Canada. Modern Woodmen of America has participated in the wonderful development experienced by the nation and has kept step with it as it entered the distinctive modern era. It has never failed the nation or its membership in times of direst emergency. It protected the homes of 1633 members who served in the war with Spain, and it paid $2,662,350 to the dependents of 2062 of its members who lost their lives in the World War, a conflict in which 59,038 Modern Woodmen engaged. Furthermore, it invested nearly $6,000,000 in Liberty and Victory bonds at that time of stress.

Chartered by the State of Illinois, the Society located its national headquarters first at Fulton (Illinois), removing in 1897 to Rocky Island. Surviving all the ups and downs of social, economic, industrial and political events, it has grown to proportions undreamed of by its founders.

One of the Societies greatest accomplishments was the establishment of a tuberculosis Sanitorium for its members at Woodman, Colorado, where victims of this dread disease receive free care and treatment, in a plant that is valued at approximately $2,000,000. One of the buildings of this magnificent institution is dedicated to the Modern Woodmen who laid down their lives in the World war. Thousands of healed patients testify to the worth of the Sanitorium.

The strength and safety of Modern Woodmen of America certificates of insurance is attested by the fact that since its organization fifty years ago the Society has never failed to make good on every certificate that had the status of a legal claim. Its permanent rate system has been endorsed by leading actuaries and State Insurance departments, and these authorities have pronounced it to be sound safe, and solvent. The Society took action in 1929 to admit women to membership on the same terms as men, offering insurance ranging from $500 to $10,000, and in the year also established its Junior department for children under 16. Thus whole family protection is offered. Retaining those fraternal features which have always distinguished it, the Society offers life insurance inclusive of every worth-while modern and up-to-date feature.

The Foresters, a semimilitary body, function within the Society and its local Camps, and they make strong appeal to thousands of men and women who assemble in regional encampments. Their skill in drill has won the praise of military experts.

At the administrative headquarters in Rock Island, Illinois, The Modern Woodman, the Societies monthly official magazine, is housed in a Publication building, erected in 1908, where it is printed and mailed to the hundreds of thousands of homes of its members.

Deeply thankful that it rounds its fiftieth year better equipped than ever to carry on its mission, Modern Woodmen of America greatly appreciates the many felicitations extended in connection with this notable anniversary, and wants its friends to know that it covets the privilege of continuing to serve the great cause to which it has been consecrated since its foundation, the protection and preservation of the home and the practice of genuine fraternity.

Here is Good News for You!

Combination Offer

Combination offers listed below. All the publications on this list are well and favorably known and are all Canadian publications of merit. Instead of giving away premiums this year, The Western Globe lowered their subscription rate to $1.00, now we are offering an even greater value.

The Combination offers are as follows:

Offer No. 1

ALL FOUR ONLY $2.75
Value $5.00 You Save $2.25

Herbert Thorp Laid to Rest

The funeral of the late Herbert Thorp, of Bentley, took place at that town on Thursday afternoon last, and was largely attended by friends from all parts of the Province. Over five hundred friends of the bereaved family were in attendance, and there were many beautiful floral offerings of regret, showing in no small way the esteem in which deceased was held in the community and in the Province at large.

The pallbearers were: Messrs. J. McPherson, C. F. Damron, George Graham and Henry Peterson, of Bentley, and Mr. N. Morrison and Thos. Jackson, of Lacombe.

Out-of-town relatives and friends who attended the funeral included: Mr. and Mrs. Wm. Weise, of Lockhart; Mr. and Mrs. R. Weise, of Lockhart; Mr. Detlaf Weise, of Comort; Mr. and Mrs. Newcombe, of Carstaire; Mr. and Mrs. Parker, of Calgary; Mr. and Mrs. Purcell and Mr. Kenney, of Purcell & Cote, Calgary; and Mr. George of Gainers Ltd., Edmonton.

Will Not Close Freight Sheds

In conversation with an official of the C.P.R. this week, our reporter asked him if it was true that the freight sheds at Lacombe were to be closed. He informed us that the Company had no such intention at present, but for economy the clerical work now done at the freight sheds would be in future attended to by the Depot Staff. James Toller, office man at the freight sheds had been transferred to Ponoka. This was the only change contemplated at present, but should freight business continue to fall off, other arrangements would have to be made. The Company has inaugurated a new express schedule between Edmonton and Calgary, with a substantial reduction in rates, which includes pick-up and delivery, and covers most of the goods now carried by freight. This low rate should be of great advantage to Lacombe businessmen. While the reduction in the staff at the freight sheds only amounts to a few hundred dollars a month, it means that that amount of ready cash is lost to our town, and future reductions would be in proportion if found necessary.

Removing the office of the freight department to the Depot offices will be of considerable convenience to patrons of the road, who will in future get all information from this office, the phone number of which is 30 ring 2.

COUNCIL FOR FEDERATION MAY BE CHOSEN

Formation of an Alberta provincial council of the Co-operative Commonwealth would probably take place early in February, it was learned on Monday. Formation of other provincial councils would follow, all leading toward the holding of a national convention at a date as yet indefinite, but probably coming before midsummer, it was said.

The Canadian Labor party, Alberta section, which, with the United Farmers of Alberta, was one of the "foundation" bodies organizing the C.C.F. last August, will hold its convention in Calgary January 7 and 8, while the U.F.A. annual gathering will also be held in Calgary January 17 to 21.

Question of sanctioning executive action of last August and of affiliation with the C.C.F. will be dealt with by each body. Soon afterwards there will be a meeting of the Dominion executive of the Federation, so far only a provisional body, to arrange details in connection with further organization work.

Early in February, according to present indications, representatives of the Canadian Labor Party and of the U.F.A. will meet as foundation groups, if their conventions authorize such action, and form the Alberta provincial council of the federation. This new body will consider all applications from organizations in the province seeking affiliation with the C.C.F.

While the question of representation at the Dominion convention had not yet been decided, it was considered likely that it would come from individual member organizations of the provincial councils rather than from the Provincial councils themselves.

So far, all affiliations to the C.C.F. had been on a provincial basis, with the exception of the Canadian Brotherhood of Railway Employes, a Dominion-wide body which was one of the foundation organizations.

KEEPING HIGHWAYS OPEN

More than 800 miles of main highway in Alberta are on the winter programme of road clearance of the provincial public works department this winter. That is, the department is making an endeavor to keep this amount of mileage of main roads clear of snow and passable at all times. In addition to this, a considerable mileage has been protected with snow fencing. This is the largest mileage the government has yet placed on the winter road clearing programme and brings Alberta into second position among the provinces of the Dominion in this respect, being surpassed only by Ontario. The snow problem is, however, not generally a serious one in Alberta, as it is in some of the eastern provinces, but occasionally in the winter comes a snowfall that demands considerable effort before the roads are cleared of traffic.

SKATES MIXED

A skate and boot, size (5½ boot), C.C.M. "Pastime" skate, were taken by mistake at the rink. Just check over your skating outfits and see if you have an odd skate and boot. If you have, leave it at the Globe office and get your own.

Our Hockey Team Getting in Form

A bumper crowd turned out on Monday last and saw Lacombe team go down to defeat at the hands of Red Deer after 80 minutes of brilliant hockey. The score was tied twice during the first sixty minutes of play, and when the bell sounded for the end of the third period, the score was again a deadlock. In the third period of overtime, Lee of Red Deer got through for a goal just as the bell rang for the end of the game.

Lacombe started off on the offensive, and it was not long before Brooks and Penman, our two fast forwards combined for a pretty rush when Penman took a pass from Brooks and bulged the net behind Stamway, Red Deer's goaler. A few minutes later, L. Calkins broke through, and in a pretty solo rush worked his way past the Red Deer blue line, and circling right past in front of the net, banged one in that completely baffled Stamway. This nice piece of play brought forth cheers that could have been easily heard at Clive. Lee, that exceedingly fast Red Deer forward, got a break soon after Calkin's goal, and taking the puck near centre ice got through and sent in a high one, which Watson could not handle. The first period ended 2 to 1 in Lacombe's favor.

The second period opened fast with Red Deer forcing the play, endeavoring to even things out. About ten minutes after the bell, Lee of Red Deer got through again and tied the score. From then on, the players on both sides fairly flew, and the battle waged from one end of the rink to the other, with both teams doing their utmost to get the edge. A rush by Pettit and Lee put Red Deer in the lead, and it again was Calkin's speedy work that tied the score, Calkins scoring on a pass from Fraser. Red Deer went into the lead right after the goal, and just before the second period ended, Jimmy Fraser got one of the prettiest goals of the game, again deadlocking the game.

Third Period—No score.

The first period of overtime was fast and furious, and play was decidedly even. Players of either side would break through and shoot, but in the overtime periods, both goalers seemed to be literally covered with horseshoes and rabbits feet, and some of the shot turned away by both net minders were nothing short of miraculous. The second period of overtime was a repetition of the first, although it was evident to everyone that both teams were tiring under the terrific pace that was set.

In the last period of overtime, the teams seemed to rally and drew upon their last supply of energy and battled like Trojans. It was sure a struggle. And when it looked like the game would end in a tie, Lee, who starred for Red Deer all through the game, got through and scored the deciding goal, the score ending 5 to 4 in favor of the visitors.

It was a great game, and the large crowd of fans sure got their money's worth. The local team was dangerous every minute of the game, and certainly should have got more goals with any kind of good luck. Their loss was just another break for the visitors—the teams were so evenly matched. The deciding goal coming when it did, gave Lacombe no chance to even things. The team is a real one and is deserving of everyone's support.

McCaugherty most ably handled the bell and neither team could complain of his fair decisions.

LACOMBE DEFEATS STETTLER

In an extremely fast game before a large crowd of fans, the Lacombe team defeated Stettler 6 to 4 here last night. This game, which was a Big 6 League fixture was one of the speediest games witnessed this hockey season. The Lacombe team played perfect hockey, and were not in danger at any point of the game. Stettler, though out-scored from the beginning, battled stubbornly, and just a few minutes before the final bell rang, their efforts were rewarded with two goals.

Lacombe opened the scoring after a few minutes of play, when Brooks, our fast right winger got through for a shot, which he slammed in from the side. Louden, for Lacombe followed Brook's example and sent in another hard drive. Stan Wilson then got away and beating Stettler's defence, marked up the third straight goal for Lacombe. Shortly before the bell rang for the end of the first frame Goode and Wright for Stettler, combined for a nice rush, and Goode taking the pass from Wright scored Stettlers only goal of the period. The period ended 3 to 1 in favor of the local team.

In the second frame, both teams played more carefully, but Fraser, picked up a loose puck near centre ice and beating the Stettler defence scored the fourth goal for Lacombe. Lacombe got her fifth goal when L. Calkin's got the nicest goal of the game. He stick-handled through the entire Stettler team, and was he stick-handling—just ask the fans. Finding that he could not shoot from his usual wing he banged in a backhander which completely fooled the Stettler goaler. Calkins goal put Lacombe away out in front so the team settled back on the defensive. As the second period closed, Gordon Duckworth broke through and made the score 5 to 2 at the end of the second period.

The third period was fast, with the Stettler team forcing the play. Almost half way through this period, Brooks got through and got his second goal of the game. When Brooks shoots something generally happens. As the game neared the finish, J. Wilson for Stettler put one behind Watson, our goaler and this goal was followed by another one by Goode. Goode and Doc Wright undoubtedly starred for Stettler, while L. Calkins was the outstanding man in our ranks. The final score was 6 to 4 in Lacombe's favor.

John MacDonald handled the bell, and his decisions were fair and impartial. He held both teams down firmly and made them play hockey.

JUVENILE HOCKEY

On Saturday, Dec. 31, the Lacombe boys journeyed to Ponoka and got the better of a hard fought game by the odd goal in five. S. Todd gave Lacombe the lead in the opening period with an assist from Frizzell. In the second period, Chapman assisted by Frizzell, put Lacombe two up. Ponoka then came back to reduce the lead. Chapman single handed once more increased Lacombe's lead. Ponoka notched the only goal in the final canto, making the score 3 to 2 for Lacombe.

Juveniles Defeat Alix

On Monday, January 2, the Lacombe boys visited Alix, where they proved too good for the east town boys. Although the Alix boys appeared much older and heavier, they were far behind the local boys in speed, combination and stick handling, consequently Lacombe did most of the pressing throughout the game, but were only able to find the hemp twice. Once in the first and once in the second period. Chapman was the scorer both times. As the last period was scoreless, Lacombe gained a 2-0 victory.

Don't forget to come and see the game on **Saturday, Jan. 7th** when the Juveniles entertain Stettler Juveniles.

Native Sons To Play Bentley Saturday

A good game is in the offing when Lacombe "Native Sons" will tangle with Bentley on Saturday afternoon of this week. Both these teams are going good, and a good game should result.

NEW HOCKEY LOOP

At a recent meeting attended by representatives from Sylvan Lake, Bentley, Red Deer and Lacombe, a new Hockey loop was organized to be known as the Little 4. Officers elected were, President, Russel Garries, Bentley; Secretary, Fred Jackson, Lacombe. The schedule calls for two games for each team, at home and away, and play-offs to determine the League title. A cup "Tip Top Tailors' Trophy," donated by Geo. Sheets, Lacombe, goes to the League winner. Governing rules stipulate that the membership of each team must be comprised of "home town boys." Games will begin on Tuesday, Jan. 3rd, Sylvan Lake at Red Deer; Jan. 6th, Red Deer at Sylvan Lake; Jan 7th, Lacombe at Bentley.

Lacombe's team will be known as the "Native Sons" and it is expected will be under the management of Fred Jackson.

RED DEER JUVENILS WIN FROM LACOMBE

Red Deer's classy juvenile puck-chasers chalked up a 5-2 verdict at Lacombe on Thursday night last in the first meeting against Lacombe this season. It was a Central Alberta League fixture and the second win of the loop for Red Deer. The teams played snappy hockey throughout.

Coming Games

FRIDAY, Jan. 6th
Lacombe at Innisfail
Ponoka at Stettler
Olds at Red Deer
TUESDAY, Jan. 10th
Innisfail at Ponoka
Stettler at Red Deer
Lacombe at Olds
THURSDAY, Jan. 12th
Red Deer at Innisfail
Olds at Stettler
Ponoka at Lacombe
TUESDAY, Jan. 17th
Olds at Innisfail
Lacombe at Stettler
Ponoka at Red Deer
THURSDAY, Jan. 19th
Innisfail at Lacombe
Stettler at Ponoka
Red Deer at Olds

ICE CUTTING

I will be ready to cut ice on Monday morning. Get in touch with me for your requirements.

Nels Pearson, Phone 193.

George Garries, of Bentley, is Dead

Mr. George Garries, pioneer of the West, and a man who in no small way contributed to the development of the great Blindman Valley, and the Town of Bentley, passed away on Saturday last in Bentley Hospital following a serious operation. Deceased was in his 63rd year. The funeral was held on Tuesday afternoon, interment being made in Bentley cemetery. The funeral was attended by hundreds of friends of the family, who assembled to pay their last respects to their old-time comrade. There were many floral tokens of regret from friends throughout the community.

Deceased came to Alberta from Nebraska in 1900, and homesteaded in the Blindman Valley, and after successfully farming for a number of years took up residence in the Town of Bentley, and engaged in various business enterprises. He took a very active part in all public matters, and was always found ready and willing to lend a helping hand in any movement instituted for the advancement of the interests of his Town.

Always enjoying robust health, his death was most unexpected, and was a great shock to his many friends. The sympathy of everyone goes out to the bereaved wife and family.

He leaves to mourn the loss of a loving husband and father, his wife, three sons, Paul, Charles and Roy; and four daughters, Mrs. E. Poling, Mrs. Lundberg, Mrs. Wm. Costen, and Mrs. R. B. Garries.

FIRE DESTROYS ELEVATOR AT CROSSFIELD

Crossfield, Alta., Jan. 3—Causing damage estimated at about $40,000 and destroying about 35,000 bushels of grain, fire which broke out at the Midland and Pacific Grain Company's elevator here early Monday, reduced the building to ruin and spread to the C.P.R. Depot, which was also a total loss.

When the brigade turned out in answer to the alarm at 7 a.m., the fire had already secured a firm hold on the wheat-filled elevator, and all efforts to check the flames spreading across the track to the depot proved fruitless.

THE CHURCH OF ENGLAND IN CANADA

St. Cyprian's Church, Lacombe
Diocese of Calgary

Rector: Rev. T. H. Chapman
Organist: Miss Kathleen Walters, L.A.B.

Friday, January 6th, (Epiphany
8:00 p.m. Special Service (joint), in connection with the "Universal Week of Prayer."

Speaker: Rev. R. B. Layton, B.A., B.D.

Subject: "The Consecration of our Churches."

Jan. 8, 1st Sunday after Epiphany
10:00 a.m. Sunday School.
11:00 a.m. Morning Prayer.
7:30 p.m. Evening Prayer.

Things To Keep In Mind

A Public Banquet will be served in the Adelphi Hotel on the evening of Friday, January 27th, at which the Bishop will be the main speaker of the evening, his subject being "Yesterday and Today." There will also be other prominent speakers. Dinner music and instrumental and vocal selections. Tickets, 75c., one-third of which will accrue to the funds of the Church. It would be a very good idea to reserve this date if you are interested in a very enjoyable and instructive evening.

The Second Annual Boy's Vocational Conference under the auspices of the Church in the Rural Deanery of Red Deer will be held at Lacombe on Saturday and Sunday, January 28-29. Open to all Anglican boys of the ages 13 to 19, the only cost to them being the most nominal Registration Fee of 25c.

It is hoped that arrangements will have been completed for a sleigh drive and treat for the children of the Sunday School, together with their teachers, on Friday of next week. They are requested to meet at the Church at 4 p.m. sharp! Of course, if the weather should be cold or stormy, this must be postponed.

OPENING OF LEGISLATURE

On Thursday, February 2, the 1933 session of the Legislature will open, according to an announcement made by Premier J. E. Brownlee. This date will be subject to change in view of any development that might take place at the conference called by Premier R. B. Bennett at Ottawa, on January 17 to discuss employment insurance and other matters. Should developments at that parley make it necessary to postpone the date, this postponement will be made, but otherwise the government hopes to open the session on February 2.

Eastern Star Instals Officers

The Annual Installation of officers of Alexandra Chapter, No. 4, took place in the Masonic Hall. Officers for 1933 are : Worthy Matron, Lela E. Taylor; Worthy Patron, David McKenzie; Associate Matron, Kathleen Jenkins; Associate Patron, Ralph Tracy; Secretary, Ruth Thompson; Treasurer, Bessie Ramsay; Chaplain, Olive Gilmour; Mar. Bessie Nellis; Organist, Florence Tracy; Cond. Annie Frizzell; A. Cond., Agnes Rankin; Adah, Alva Preston; Ruth, Jemima MacKenzie; Esther Margaret Ross; Martha, Lilian Marshall; Electa, Mabel Hewitt; Warder, Lettie Langrock; Sentinel, W. J. Cranna.

The installation was in charge of Margaret Mann, Grand Ruth. She was assisted by Amanda MacKenzie, acting as Grand Marshal; Selena Trott, G. Chaplain; Annah Aldwinckle, G. Pianist; Rachel Craigen; G. Warder; J. L. Craigen, G. Sentinel.

Following the impressive ceremonies a delightful luncheon was served in the banquet room by the Past Matrons. The evening then drew to a close, every member and officer looking forward to a happy and prosperous year.

BENTLEY NEWS

The Sunset Branch of the W.I. are having a concert and dance in aid of the Bentley Hospital, in the Bentley Community Hall on Friday evening, January, 13th, at 8.30. Admission tickets 25c. There will be community singing, and we will have our favorite artists from Lacombe, Leedale, Centre Valley and Bentley. Good music is a cured. "Our Orchestra" will set your feet dancing. Ladies of the W.I. will be at the lunch counter with good things to eat. Everybody come. It is for a good cause. We need the hospital, and the Hospital needs your support. Don't forget the Date, Jan. 13th, at 8:30 o'clock.

Miss Madge Brown, R.N., who has been visiting Edmonton friends during the holidays, returned to her duties at the Hospital on Wednesday.

Born, at Bentley on December 30, 1932, to Mr. and Mrs. Carl Posti, of Eckville, a daughter.

DOUBLE WEDDING Sather—Wendland Farewell—Sather

On Monday, Dec. 26th a very happy event took place at the home of Mr. and Mrs. Edward Sather, of Wanham, Alberta, when Grace Farewell, daughter of Mr. and Mrs. S. H. Farewell of Blackfalds, Alberta, was united in marriage to their son, Edwin Jalmer Sather, and their daughter Elvina Theresa became the bride of John Herman Wendland, son of Mr. and Mrs. Charles Wendland, of Bolseker, Alberta, the double ceremony being performed by Rev. Mr. Rich of Grande Prairie, Alberta.

There were over thirty-five relatives and friends present and after a big wedding dinner enjoyed by all, a jolly evening was spent, with music, etc., after which the happy couples left for their respective homesteads in the Wanham district.

SPRUCEVILLE NEWS

The regular evening meeting of the U.F.A. and U.F.W.A. will be held at the home of Mr. James Boden, on Tuesday, January 10th. Hostesses, Mrs. J. B. Crooker and Mrs. Nelson Hall. North side bring cake.

There will be an old time dance in the hall on Friday, Jan. 13th. Flagal's orchestra in attendance. Come and have a good time.

We are sorry to hear that Mr. Barnes and Mr. Walker, have both been quite sick with the "flu". We hope they are feeling better by now.

The novelty dance held last Friday night, was well attended and everyone spent a very enjoyable evening.

CARD OF THANKS

Mrs. Herbert Thorp and family wish to thank their many friends for their kind assistance and sympathy during the illness of their beloved husband and father. They especially wish to thank those who sent floral tokens of regret.

"Mac's Best" Wheat Breakfast Cereal. Highest quality; pure white in color. W. J. Trott, Agent.

The regular meeting of the W.I. will be held Saturday, Jan. 7, at the home of Mrs. A. Vaughn, Day St., at 2:30 p.m. The meeting will take the form of a social afternoon, and an interesting program is being prepared. Hostesses: Mesdames Anderson, Craigen, Cranna and Clarke.

FOR SALE

1 team Horses; Wagon and Box; Set Harness; Mandrel and Saw; Belting; Horse Power (10 horse); Tools, etc.

Alberta Barn, Lacombe

Palpitation of the Heart Nerves Bad - Could Not Sleep

Mrs. Fred Bingham, Swift Current, Sask., writes:—"I was bothered with palpitation of the heart, and my nerves were so bad I could not sleep.

I was getting desperate and confided my trouble to a friend who recommended me to use Milburn's Heart and Nerve Pills. I purchased a box and got such relief I would gladly recommend them to all who are troubled as I was."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

What Really Counts?

What is the thing that really counts in your life?

Many people who had always accepted what life brought to them from day to day without giving much thought to the matter are in these times, as a result of experiences through which they or relatives and close friends are passing, or as the outcome of their reading and observation, being compelled by the very impact and force of present conditions to seriously ask themselves what, after all, is the thing that really counts in my life?

Take the case of a man known to the writer. Having for more than a quarter of a century held responsible positions in one of our Western Provinces, and received a very gratifying salary, he suddenly found himself three years ago thrown out of his employment. Since then he has had no secured position but has employed his energies in various ways and in return for such remuneration as it was possible to obtain.

Today his income is at its lowest point yet touched. He is aware it may further shrink if not entirely disappear, as has been the experience of so many.

During these past three years this man has seen the value of such property as he possessed reduced to fifty cents on the dollar of its former value, and it is presently unsaleable at such a reduced figure. Such reserves as he was able to build up are steadily disappearing, and he is now approaching three score years in age.

Has he become discouraged, embittered, railing at his fate, and ready to turn and rend somebody else, or some institution or corporation, or the whole system of economics and government under which he lives, which he himself helped to build up, and under which he is now sustaining loss where formerly he profited? That is, does he regard material things as the things that really count? No, although he cannot see light ahead at the end of the tunnel through which the world is passing, he is not discouraged nor embittered. He has not the slightest desire "to take it out" on somebody else. While recognizing, as every observant person and student of affairs must recognize, that changes and reforms are urgently, imperatively required in our social, economic and political structure, he also recognizes that he must accept his full share of the responsibility for the mistakes of the past, and that, instead of throwing all the blame on the system, or on those whom he assisted to place in positions of authority to administer that system, some of that blame must be apportioned to himself. If others made mistakes, so did he, and he is fair enough to admit it. He realizes where he made mistakes, not deliberately, but in the belief that he was doing the wise thing, but mistakes nevertheless. Why then lay all the blame on the system he helped to create and develop, which for years he upheld, or upon those now in charge of that system and struggling against an accumulation of past mistakes,—his own included,—as well as the mistakes of others in far-distant lands over which they had no control but whose mistakes re-act upon us, as ours re-act upon them?

This man is no high idealist. He has a healthy respect for the purely material things of life. He enjoyed them in the past; he acutely misses them now; he hopes to enjoy them again. But he has learned to realize that, after all, they are not what really count in life. He has health, and when he sees others in sickness, possibly suffering and slowly dying of an incurable disease, he is thankful for something far exceeding great riches.

If he alone had suffered loss, he might feel embittered. But when he sees countless thousands who have sustained similar, possibly greater losses, he feels no bitterness, but a new and greater sympathy with everybody else. His old indifference to many questions and problems, his reluctance to give of his time, talents and energy to their solution, has passed away. He is not 'so busy" now, with his own selfish concerns that he has no time to devote to public and community affairs. He has discovered there is something much bigger and infinitely more important than himself and his personal affairs.

He may not weather the storm of the depression in which he, with so many others, is engulfed, although he is not the type to give up. But while a loser in one sense, he is a gainer in another, and the whole world is the gainer too. The universal experience of losing something, is having a humanizing effect not only on this man, but on hundreds of men and women. Puzzled as they may be by present conditions, the youth of today will be stronger than those of the past generation who were cradled in the lap of prosperity, if, indeed, not of luxury.

From the experiences of the present is it not possible that we all may learn that it is not what happens to us but what happens within us in times of stress that determines whether we are defeated or victorious; that whether we win or lose does not matter so much, but rather how we bear the battle through?

Tells Of Life In Russia

Communists Small Percentage Of Population Says B.C. Engineer

Expressing a lack of faith in the Russian five-year plan and voicing the opinion "there is probably as big a percentage of Communists in Vancouver as in Russia," J. A. McLaughlin, British Columbia mining engineer who recently returned from a two years' residence in Russia, told Vancouver Board of Trade members of life as he found it in that country.

"You have to realize that there are only about 3,000,000 Communists in Russia, a country of 165,000,000 people. The Communist Central Committee is in complete control. The political police have the authority and people live in terror of them," he said.

Mr. McLaughlin went to Russia as engineer on a copper mine development proposition for which the five-year plan called for production of 10,000 tons refined copper annually. But in two years only 600 tons in all were produced.

Works Without Battery

A batteryless flashlight has been put on the market. It has a small dynamo in its base. A few turns of the base produces enough energy to set the bulb glowing and, when the light diminishes, all one has to do is to turn the base again.

Salesman—"What kind of car would you like madam, four, six or eight cylinders?

Timid Customer—"Couldn't I begin with one?"

Celebrates Anniversary

Lethbridge Herald Completes 25 Years As Daily Newspaper

Rounding out a quarter century of continuous publication as a daily newspaper, the Lethbridge Herald issued a special 25th anniversary edition recently, in which appeared many congratulatory messages from Canadian public men and newspaper publishers to Senator W. A. Buchanan, publisher.

The Herald was first established as a weekly paper in the autumn of 1905 by F. E. Simpson, of Cranbrook, B.C., and W. A. Buchanan came from St. Thomas, Ont., and purchased a half interest. Later he acquired the entire property and, on December 11, 1907, launched the Herald as a daily newspaper.

Members of the Western Associated Press from its inception and later of the Canadian Press when eastern and western Canadian co-operative news services were merged, the Herald has received a full leased wire press service since 1917.

Not Greatly Impressed

An American in England was giving some illustrations of the size of his country.

"You can board a train in the State of Texas at dawn," he said, impressively, and twenty-four hours later you'll be in Texas!'

"Yes," said one of his English listeners, with feeling, "we've got trains like that here, too."

She: "Our engagement is over, and don't you dare ask me to return your ring."

He: "I won't, but the jeweller will."

Transparent steel, made of sheets thinner than paper, is proving useful in the manufacture of scientific instruments.

The world's heaviest meat eaters are the people of the Argentine. They average about 346 pounds a year per person.

May Broadcast Power Without Any Wires

Young Kitchener Inventor Claims He Has Discovered Method

Two years of experimenting have resulted in his discovery of a method to transmit electric power long distances without wires, is the claim of 22-year-old Frank Fedy of Kitchener, Ontario.

Fedy, a former insurance agent, said he demonstrated his equiment for engineers in Toronto and that his apparatus functioned perfectly. Power broadcast from his transmitting stations was picked up two blocks distant.

An engineer, who was in Kitchener from Toronto admitted that the experiment showed Fedy "has something." The young inventor is going to Montreal to demonstrate there. He visualized a central transmitting station in Kitchener, which would broadcast electrical energy to heat and light homes in the city and in the surrounding country for a radius of 100 miles.

An aerial on the roof of a house, similar to a radio antenae would take the power from the air.

A receiving outfit could be manufactured to sell as little as $5, the inventor said. He added he has secured financial backing in Toronto to the extent of $30,000.

For two years after he graduated from St. Jeromes' College at Kitchener, Fedy worked as insurance agent, "just to pay expenses" so he could continue his experiment in the privacy of his boarding house bedroom. In July he met with an automobile accident, which rendered him blind for a month. His eyesight is not yet completely restored, but he has finished his invention.

Too Good To Be True

New Method Claimed To Cut Auto Oil Bill In Two

The possibility of cutting automobile oil bills in half by a new method of refining oil was predicted at a meeting of the American Society of Mechanical Engineers by William F. Parish and Leon Cammen of New York. The report, however, was criticized by a half dozen other speakers, who held the claims were "amazing" and "doubtful."

The Parish-Cammen report said that under the new system the crankcase will never have to be drained, and the engine will develop more power and use less gasoline.

Ten years of practical tests were cited to back their contention that in all kinds of engines and under all varieties of road conditions nearly all kinds of oil can be made by the new process to out-perform anything now produced.

The oil in these tests was crankcase drainings, the mucky stuff motorists throw away. Parish and Cammen cleaned this oil and in all cases claimed to have brought forth a better lubricant than the original.

Worms however generated, are found in the digestive tracts, where they set up disturbances detrimental to the health of the child. There can be no comfort for the little ones until the hurtful intruders have been expelled. An excellent preparation for this purpose can be had in Miller's Worm Powders. They will immediately destroy the worms and correct the conditions that were favorable to their existence.

A Strange Story

Family Living Near Chicago Had Never Seen Street Cars, Moving Pictures Or Radio

The strange story of an isolation so complete that none of a family of nine children has ever seen a moving picture, a street car or radio, although they have lived all their lives near Chicago, came to light recently.

They are the children of Joseph Steiff, 60, a farmer of Wheeling, Ill., who came to the United States 30 years ago from Russia.

The story was revealed when Steiff appealed to police to find his oldest child, Mary, aged 23, who fled from her home. The authorities were told she left because a dove flew around her head and she regarded this as an evil omen. She later was found at the home of a neighbor.

Have Stood Heavy Loss

British Steel Firm Drops £247,000 On Bridge Contract

Few companies of any size have escaped the toll of heavy losses in the last year or two. An outstanding case is that of the Dorman, Long Company of London, England, one of the foremost iron and steel companies in the world. Contracting for the construction of the great bridge over the harbor at Sydney, Australia, the company admits dropping £247,000 on a £4,250,000 project. Depreciation, during the four years construction period, and adverse exchange rates, are said to have contributed largely to the loss.

Revenue From Trees

Christmas trees cut in eastern Canada for export to the United States run to hundreds of carloads annually, and for 1931 trade figures show such exports from the Dominion reaching a value of $326,471.

Miniature squirrels made of real fur, with bushy tails, are worn as hat ornaments in Europe.

MAKES PROTEST

Hon. W. D. Herridge, Canadian Minister to Washington, has handed a protest to the United States Foreign Minister against the seizure of the Canadian vessel, "Mazel Tov." The note also warned the United States that Canadian co-operation in preventing liquor smuggling may end if these seizures persist.

Singing Fiddler Of Lost Hope Hollow

Aged Musician From Kentucky To Attend Song Festival In London

On his way to attend the National Folk Song Festival at Albert Hall, London, England, Jilson Setters, the "singing fiddler of Lost Hope Hollow" has sailed on the Cunarder "Samaria," from New York. This last minstrel of the Southern Appalachian Mountains, will be a featured performer at the festival.

Mr. Setters, who is now more than seventy years of age, was blind for sixty years. Early in youth he learned to play the violin. Of English birth, he learned the songs and tunes of England from his parents and other members of his family, and has since carried them "in his head." He made a specialty of Elizabethan ballads which had been handed down by word of mouth from generation to generation.

A few years ago while S. L. Rothafel—"Roxy"—was journeying through Kentucky, he heard Setters play and was instrumental in bringing him to the attention of the American public. Since then he has been on the air several times, singing his songs and playing his fiddle in a way that has brought delight to thousands of radio listeners.

But recently recovering his sight, the world is all very new to him. He looks forward with keen delight to his visit in England. He is eager to see a "lord and lady of beauty bright," a "knight with a milk-white steed and a gypsy queen," like his old song ballads describe. He expects to find the quaint England of three hundred years ago.

Although unfamiliar with written notes, Mr. Setters is a born musician. His skill has been described as inimitable He knew with the left hand, a very unusual accomplishment for a violin player.

The aged musician inherits his love of music from his grandfather, who was the first wandering music teacher in the mountains of Kentucky.

Some of his ballads are long, but he bars any sign of an interruption. He insists on singing a ballad to the end so that "folks will know if the princess was joined in wedlock to the love of her heart," or if a cruel lord separated her from the one she loved. He is unfamiliar with modern slang and his speech is well-flavored.

On his trip to England he will carry his "wearing clothes" in a homemade hickory basket. He will also carry a gourd from which he will drink water, even while in the land of brown stout and amber ale. He still carries his fiddle in a cloth poke just as he did years ago when he roamed or was led over the high hills of Kentucky, often being the entire orchestra at a barn dance or a house party.

He will be accompanied on his tour by Miss Jean Thomas, of 17 East 8th Street, New York, founder of the American Folk Song Society, of which Percy Mackaye, Ida M. Tarbell, William Allen White, Stephen Vincent Benet, Otto H. Kahn, Irvin S. Cobb, Deems Taylor, and Alice Hegan Rice are active members. Miss Thomas had written newspaper articles about Mr. Setters years before he came to the attention of "Roxy."

When Mr. Setters returns from England he intends to retire to his old windowless cabin at Lost Hope Hollow, in the Kentucy hills, there to ponder over the great curiosities he viewed in the "outside world."

Hard On the Fixers

Pittsburg Issues Triplicate Ticket For Violation Of Traffic

Something new in "tags" for traffic violations—a ticket which authorities say "can't be fixed"—has been introduced in Pittsburgh. The new tag is issued in triplicate, one copy going to the offender another to the traffic court, and a third to the controller, who will be obliged to check back on every ticket issued "Now," said one traffic officer, "we'll see if the fixers and their political friends can get around this one."

Douglas' Egyptian Liniment is a quick, certain remedy for Hoof Rot or Thrush. Four or five applications are usually enough.

"Have you heard of this new method of learning French in nine easy lessons?"

"Yes, but I'd rather take 10 and do it thoroughly."

Interesting Item In Records

Case Diagnosed Over Telephone Fifty-Three Years Ago

A press dispatch which referred to Dr. John Harvey Kellogg, head of the Battle Creek Sanatarium, diagnosing the case of a former patient by transatlantic telephone, led F. A. Field, curator of the historical museum of the Bell Telephone Company, to search old records and brought to light an interesting item. Fifty-three years ago the telephone was used, probably for the first time in Montreal, for the purpose of diagnosing an ailment, according to a newspaper clipping which Mr. Field found in a scrap book compiled by a former president of the company.

The incident as told by Mr. Garvey, manager of the Dominion Telegraph Company, appeared in the Montreal Evening Post dated Nov. 2, 1879, and in part is as follows:

"A fond mother, one of our subscribers, was disturbed in her slumbers by a hacking cough emanating from her child's crib. She instantly signalled through her telephone for her medical attendant, also a telephone subscriber. Both parties were placed in communication and, after a few seconds, the doctor replied: "Let your child cough into the transmitter." This was done, and the answer came back, "Put your child to bed, that's not croup!"

Talent Shop Helps

Sells Articles Made By Needy People In Montreal

"This Talent Shop sells the work of men and women who are struggling to keep their homes together," reads a sign on the walls of a shop conducted under the auspices of the Anglican Council of Emergency Relief, Montreal, whose venture stands between hundreds of people and starvation.

In a shining salesroom painted yellow and mauve, are cases displaying the work of the people who are assisted by sale of their products such as home-made bread, rolls, cakes of all description, dainty sandwiches and other delicacies for bridge or tea party, chocolates, jellies, marmalade and preserves. Then there are knitted garments for babies and children and on the shelves are "lickable" toys—stuffed animals and fairy tale figures, enclosed in cellophane, ready for Santa Claus.

Services of butlers and waiters are available to say nothing of those of dressmakers, people to repair and polish furniture and do all manner of skilled or plain tasks. Through the volunteer work of the committee, overhead charges are eliminated, eighty per cent. of the money received goes to the worker and 20 per cent. to the work carried on by the Anglican Council of Emergency Relief.

Will Carry On Work

Successor To Nelson's Jack Miner Taking Care Of Ducks

Ducks on the protected area of the West Arm, opposite Nelson, B.C., will get their breakfast as usual this winter, after the ice arrives.

For many years Chief Constable Thomas H. Long fed the ducks as a labor of love after the ice and snow came. He became known as Nelson's Jack Miner. The ducks got to know him, swarming around when he put in appearance, but keeping at a discreet distance when a stranger accompanied him.

Chief Long retired recently and went to the coast to live, but his successor, Chief Constable Alex Stewart announces that he will continue the work. The bill for the feed will be paid by the British Columbia game board.

Wish Elephant Would Forget

Zoo Owners Find Circus Trick Is Proving Costly

Authorities of the Whipsnade Zoo in London, pray fervently every night that Dixie, the new elephant will forget how to sit down.

Dixie, who weighs two and a half tons once belonged to the Bostock-Wombwell Circus. For 20 years she convulsed circus audiences by sitting in a specially built chair which was offered her by the clown.

Now that the zoo has bought her, Dixie is running up a pretty bill. She will sit in chairs at the slightest provocation, and the ordinary chair cannot withstand her weight. A wreckage of chairs bears testimony to Dixie's early training.

World Problems

The return of prosperity to Britain and all other countries, depends first and foremost on the achievement of sane international agreements to relieve the burden and the increase of armaments to remove the incubus of debts, to remedy the causes which have thrown the currencies of half the world into the melting pot and to cut the bonds which strangle international trade.

Removing the Cause

"Good morning, madame," said the serious-looking stranger who had called. "I represent the Society of the Suppression of Profanity It is our object to take strong language right out of your life. We——"

"Come here, Dad," called the lady of the house. "Here's a man wants to buy our old car."

Mounted Traffic Police

Experiment Tried Out In London Has Proved a Success

Mounted policemen are being employed to direct traffic at different points in the west end of London, the experiment being tried with only three mounted officers in Whitehall and two other points at first. It worked so well that the system is being extended.

The horses are so well trained that the policemen are able to drop the reins and use both hands for signalling. Scotland Yard officials are convinced, after watching the work of the men, that their wider range of vision gives them a better control of traffic.

The experiment is being extended so that foot police can be released for more important duties.

At present it is not intended to use mounted officers at such busy centres as Oxford Circus, Piccadilly Circus, and Trafalgar Square. Before such places as these are brought under mounted control further experiments will be carried out at places where it is convenient for the horses to remain stationary in the centre of the road.

To avoid hardship for the horses the mounted men on traffic duty will be relieved every hour or two hours by other mounted men.

Satisfied Her Curiosity

Woman Ventures To Bottom Of Harbor At St. John

Believed to be the first woman in Canada to don a regulation diving suit and descend into water, Miss Jean A. MacCallum, Partridge Island school teacher, knows what it feels like to touch the bottom of Saint John harbor. Wearing some 90 pounds of gear, she accomplished the feat without mishap, just for the sake of "curiosity."

Incidentally, Miss MacCallum has a unique school. Partridge Island is at the harbor entrance, and the school is part of an old fortification. Instead of the usual fence, an old earthworks wall surrounds the building and also encloses a lighthouse. Remains of old canon take the place of modern playground equipment. About 30 persons live on the island and ten children attend the school there at present. Their fathers are employed with the signal service and quarantine station, Miss MacCallum goes out to the island each morning and returns in the evening.

Banquet Was Fatal To Chinese General

Poisonous Bone In Snake Dish On Menu Caused Death

Chu Chao-Hsin, inspector-general of foreign affairs in the Canton government, and formerly charge d'affaires in the Chinese legation in London, died suddenly following a dinner at naval headquarters in Canton.

Physicians said that snake poisoning caused death.

The dinner was in honor of Admiral Sir Howard Kelly, commander-in-chief of the British naval forces in the Far East.

Mr. Chu was once the Chinese ambassador to Italy and also consul-general in San Francisco.

Snake was on the menu at the dinner given by the Naval club. Mr. Chu is believed to have swallowed a poisonous bone which the cook had overlooked.

Official Fertilizer Guide

Helping the Farmer To Select Best Combination Of Plant Food

One of the most important functions of the Fertilizer Division of the Dominion Seed Branch at Ottawa is the inspection and analysis of fertilizers, under the provisions of the Fertilizers Act. These analyses are available in printed form for the use of farmers throughout the Dominion, and are valuable in helping the farmer to select the fertilizer, or combination of plant food, best suited to his particular purpose. Copies may be had without charge by simply writing to the Publications Branch of the Department of Agriculture at Ottawa.

Strangled With Asthma is the only expression that seems to convey what is endured from an attack of this trouble. The relief from Dr. J. D. Kellogg's Asthma Remedy is beyond measure. Where all was suffering there comes comfort and rest. Breathing becomes normal and the bronchial tubes completely cleared. This unequalled remedy is worth many times its price to all who use it.

Something Else Needed

An English scientist has developed a chemical which will rid a football field of snow, ice and frost in fifteen minutes, at a cost of $100. Unfortunately, however, nobody has thought of a way to warm up the atmosphere the spectators have to sit in

A muskrat farm of 53,920 acres in area, comprising an island in the delta of the Saskatchewan River, southeast of The Pas, Manitoba, is claimed to be the largest fur ranch of its kind in the world.

Sing Sing prison got its name from the Indian words meaning "a stony place."

It takes about 15 months to season the wood used in making ordinary safety matches.

Bank's Warning on Currency Inflation

BANK OF MONTREAL MEETING

The annual meeting of the shareholders of the Bank of Montreal, held at the Bank's Headquarters, was largely attended. The report and statement of account, particulars of which have already been published, were unanimously adopted, and the retiring directors were unanimously re-elected.

Sir Charles Gordon, the president, said that during the year they had been confronted with declining trade, dislocated foreign exchange, lessened demand for banking accommodation and low rates of interest in the world's monetary centres; yet the Bank had managed to earn fair profits, to preserve a strong liquid position and to meet the legitimate requirements of their customers.

W. A. Bog, joint general manager with Jackson Dodds, said in part:

"Your Bank has come through this period with undiminished prestige, for it can be claimed without exaggeration that events have only served to emphasize the important and outstanding position which it occupies in the business affairs of this country."

Both the President and the General Manager came out strongly against any inflation of currency in Canada, as had been advocated in some quarters in connection with a suggested establishment of a national central bank. Sir Charles Gordon said that for 18 years, under the provisions of the Finance Act, Canada had had all the advantages which might come from a central bank, the legislation having admirably performed its purpose in this respect. Monopoly of note issues by the Government, he declared, would not increase by a single dollar the amount of currency in the hands of the public, unless the notes were made irredeemable and recklessly emitted From the time of the French Revolution in the 18th century, he said, the abuse of financial history was strewn with the wrecks of ventures in irredeemable paper money, and if there was one fact in finance more firmly fixed than another it was the certainty that the unrestricted issue of paper money culminated in disaster. He said:

"I may point out, moreover, that we in Canada do not suffer from inadequate credit or inadequate currency Our banks welcome borrowers to whom they can safely lend, and as trustees of depositors from whom their lending resources are derived, banks ought not to lend on any other condition. So far as our banking system is concerned, it is well to remember that not a single depositor has had to wait for a moment to get his money from a Canadian bank during the past year, while tens of thousands of depositors in the United States have had to wait in line, only to be told finally that their bank had closed its doors. This fact is an argument that will appeal to most people."

Intelligence Essential

College Degree Not Much Help In Motor Car Operation

The possibility that motor vehicle operators eventually may be forced to take various kinds of mental tests, does not mean that one will have to have a college degree to pass the examination? Those busying themselves with such tests are seeing to it that they are designed to reveal a man's intelligence, not the extent of his education. There is, of course, a world of difference between the two.

By way of indicating that the chance of one man is as good as another if the order of intelligence is somewhat equal, one can cite the results of an examination recently given to two groups. One was composed of college teachers; the other of taxi drivers. The latter won, hands down.

Simple and Sure.—Dr. Thomas' Eclectric Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a dressing to apply. The directions are so plain and unmistakable that they are readily understood by young or old.

No Time For Drifting

Unity Of Effort Should Be Aim Of Every Statesman

Over from England to join his wife in the United States, Viscount Astor says "We must do something definite, or there will be trouble."

One of the main obstacles is that whenever any State leader suggests anything, all his political enemies join forces to howl him down. It is time the so-called statesmen realized the folly of that course. This is an hour when unity of effort should be made, even if it does involve the sacrifice of some temporary political advantage.

Imports into Venezuela are expected to increase in the next few months.

Bond prices in Italy were recently quoted the highest ever known there.

DR HAMILTON'S PILLS

STOP HEADACHE INDIGESTION BILIOUSNESS CONSTIPATION

The Stratosphere Holds Secrets Of Many Things Which Are Puzzling Scientists

How far can man penetrate into the upper air?

The stratosphere, as the upper reaches of the atmosphere are called, begins at a height of ten kilometres, or about six and a quarter miles above sea-level. At the moment the highest point reached by man is 53,-672 feet, or just over ten miles, which was attained by Professor Piccard in his second balloon ascent.

But the exploration of the stratosphere is only beginning. It holds the secrets of many things which puzzle the scientists, and Professor Piccard believes that to uncover these secrets many more ascents must be made.

One of them, he thinks, should be undertaken in the Arctic regions, and he has suggested the Hudson Bay district as a suitable starting-point. Probably some of the scientists now engaged in "Polar Year" researches would be the best men to make the attempt. They have the necessary scientific training, and at the same time are equipped with knowledge of the Arctic regions, and could fend for themselves in the event of the balloon coming down far from civilization in the midst of the polar waste.

Aeroplanes also can penetrate the recently won the aeroplane altitude stratosphere, and Capt. C. F. Unwins record for Britain by ascending 43,-976 feet, or almost exactly eight and a half miles.

He would have gone still higher, but his gasoline was getting low. However, he will probably make another ascent shortly and try again.

In a previous flight Capt. Unwins climbed beyond 40,000 feet without knowing it. His altimeter stopped at 30,000 feet, and he came to the conclusion that, for some reason, his machine was unable to climb beyond that. So he abandoned his attempt and landed. Then it was discovered, on examination of the barograph, that he had been nearly eight miles up. The altimeter had stopped working because it was frozen.

The tremendously low temperatures of the upper atmospheres have always been a big problem in high altitude flying. Not only do they sometimes put instruments out of action, but unless elaborate precautions are taken, they would put the pilot out of action, too. So his clothing has to be electrically heated, the waistcoat, socks, and fur gloves being threaded with fine wires for this purpose. The goggles have also to be treated electrically to prevent ice forming on them. For breathing, oxygen is necessary, and is obtained through a chin and mouth mask.—Answers.

Has Many Occupations

King Albert Of Belgium Was Once Newspaper Reporter

King Albert of Belgium is probably the only king who has been a newspaper reporter. Before he ascended to the throne he toured Europe, writing articles on shipping problems for a Belgian newspaper.

And once, when he paid a visit to America, he got a temporary job on a New York newspaper. He reported several events and no one on the staff knew his identity.

Then one day he was sent out to report a fire and came back without a story. He had forgotten his police card and was not allowed by the police to collect any information!

But since then Belgium's king has had a fling at many occupations. He has labored on Antwerp docks. He has driven locomotives. He has fired steel furnaces and he has descended into mines and hacked away at the face of coal seams.

The Hunter's Primer

Good Idea Which Might Help Eliminate Careless Shooting

A hunter's primer should be prepared for all who secure a license to shoot game, something like the kind we used to study in the first grade. "This is a man," "This is a Moose," "This is a woman," "This is a partridge," etc. It seems that a man can shoot his friend in the woods with the same freedom that Al Capone bumped off an enemy on the sidewalks of New York except that Al did not have to pay $2 for a license. Surely a hunter who kills a man should not be given the chance to shoot another for a good many years. That should be the very least penalty inflicted on him.

Prefer To Be Blonde

While A. T. Pyeroft, New Zealand naturalist, was collecting curios in the Santa Cruz group of islands he obtained moving pictures of eight Polynesian men, heavily tatooed, who arrived at Vanikoro, after a voyage of 120 miles in dugout canoes from their home on the island of Tikopia. These men are totally different in type from the Melanesians having long hair, stained yellow by treatment with lime.

Oranges were first grown in California in 1873.

New Radio Policy

Will Likely Follow Plan Adopted By British Broadcasting Company

The radio commission of Canada will probably follow the policy adopted by the British Broadcasting Company in connection with the handling of election speeches, Hector Charlesworth, chairman of the newly-formed body, declares. In the United Kingdom, he explained, leaders and organizers of political parties are requested to agree on ceratin periods for broadcasting election speeches, so that other programmes are not seriously interfered with.

The rule confining advertising content to five per cent. of each programme would be rigidly adhered to, Mr. Charlesworth declared, "but we must of necessity allow some time to Canadian advertisers; if not, they would be placed at an unfair advantage with U.S. advertisers. My idea with regard to the situation is that no Canadian station shall broadcast advertising in connection with a product that is not Canadian, or at least the product of a branch factory in this country."

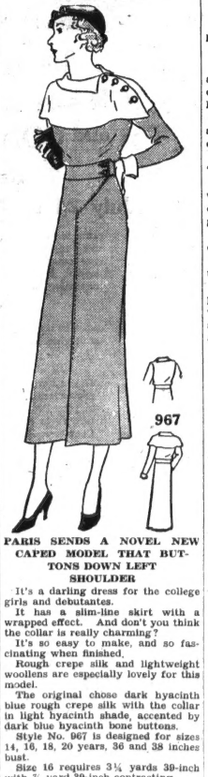

Has To Be Punctual

Man Doing Newspaper Work Gets Discipline Into System

Hector Charlesworth, Chairman of the Canadian Radio Commission, in an address said: "One factor about newspaper work which nearly everyone forgets is that a newspaper office, in addition to being a medium of news and views, is a factory and a manufacturing establishment. The only difference is it makes its deliveries on time. A newspaper has to keep its promises; it has to have its paper delivered on the doorstep every morning. Every man connected with a newspaper, no matter what his function, gets that discipline into his system."

By Ruth Rogers

PARIS SENDS A NOVEL NEW CAPED MODEL THAT BUTTONS DOWN LEFT SHOULDER

It's a darling dress for the college girls and debutantes.

It has a slim-line skirt with a wrapped effect. And don't you think the collar is really charming?

It's so easy to make, and so fascinating when finished.

Rough crepe silk and lightweight woollens are especially lovely for this model.

The original chose dark hyacinth blue rough crepe silk with the collar in light hyacinth shade, accented by dark blue hyacinth bone buttons.

Style No. 967 is designed for sizes 14, 16, 18, 20 years, 36 and 38 inches bust.

Size 16 requires 3¼ yards 39-inch with ⅞ yard 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Stockholm Makes Use Of Electrical Devices

Stock Exchange, Fire Alarm, and Telephone System Revolutionized

A series of unique automatic devices using electricity practically as a "maid-of-all-work" have been constructed and installed by the L. M. Ericsson Telephone Company.

The latest novelty in th a line is an entirely new installation for the automatic listing of stock exchange quotations, recently installed in the Svenska Handelsbanken in Stockholm. The new device consists of large boards on which the quotations of the stock exchange are automatically listed as the prices of the day are set in the stock exchange. The apparatus is manipulated from a central sending desk, where a person by means of electric buttons gives the various rates as well as the difference in comparison with previous quotations, all of which appear in luminous figures on the boards placed in different departments of the bank.

The L. M. Ericsson concern, besides its large international automatic telephone business, has specialized in a number of similar signalling systems, including large railway switch and signal installations, an ingenious fire alarm system, a voting apparatus for parliaments and assemblies, a system of synchronized electric clocks and automatic totalizators for race course betting.

All business on the Stockholm Stock Exchange is now performed silently by pressing buttons and by means of a central registration board installed by the Ericsson engineers. Large establishments, such as the new Ford plant in Stockholm and the Swedish Match Company's head office, have an efficient seeker system attached to the telephone switchboards by means of which a person who is not in his own office can be sought for by telephone in at least a dozen different parts of the building at the same time.

A new order for an automatic fire alarm system has just been placed on the municipality of Frederiksberg in Copenhagen. This device, regulated by the rising temeprature in a case of fire, has already averted several threatening fires, including one behind the stage during a performance in a Stockholm theatre and another in one of Sweden's largest flour mills near Stockholm. It automatically sets fire signals going in various parts of the house and at the same time calls the fire brigade at its headquarters, registering the location of the fire.

Seems To Be Plenty Wrong

Dean Of Columbia University Criticizes United States

The trouble with the United States, as Dean William F. Russell, of Teachers' college, Columbia University, outlines it, is:

The calendar is wrong, Christmas and other holidays should always fall on the same day.

The system of hygiene and food is "terrible."

The governmental system is "the worst in the world." ("I am depressed at the terribly bad nature of our government," he said).

Spelling is "as bad as the Chinese."

The system of weights and measures is wrong.

The method of dress is: "Women paint their faces, cover themselves with rings and adorn themselves like savages. Men's dress is uncomfortable, hot and expensive."

Even ham and eggs were put on the dean's frying pan.

"We eat ham and eggs all over the country," he said, "yet they say that we are not a uniform nation."

The remedy, he told a student convocation, is either a dictatorship or "the return of intelligent thinking." He opposed the dictatorship, and was not overly-optimistic about the thinking.

Smallest Quantity Of Light Measured

Apparatus Catches Flow Of Three Electrons Every Minute

The smallest quantity of light ever detected electrically—that of the flow of three electrons every minute—has been caught and measured at Rice Institute, Houston, Texas.

The apparatus reaches farther out into the invisible than previous instruments by combining a photoelectric cell with a cosmic ray counter. It was described in the physical review by Gordon L. Locher of the Institute and of the Bartol Research Foundation of Franklin Institute, Philadelphia

How slight is a ray may be visualized from the fact that the ordinary dull red glow of a radio tube is the flow of about 100,000 electrons not in a minute, but in a second.

In Massawa, on the Red Sea, 120 degrees in the shade was registered recently.

The area of Alaska is nearly equal to that of Texas, California, Montana, Maryland, and Delaware combined.

Population considered, Holland has the second largest colonial empire.

The voting age for men and women in England is now 21 years.

CANADIAN AND AUSTRALIAN DELEGATES URGE CAUTION

The serious situation arising in the League of Nations Assembly over the Japanese-Chinese deadlock caused Right Hon. Stanley Bruce of Australia (left) and Hon. C. H. Cahan of Canada (right), to urge the League not to do anything which would be offensive to Japan and cause a war in the Far East.

Why Jury Duty Is Unpopular

Illness Or Death Only Reasons Accepted For Exemption

An Ontario judge refused to grant exemption from jury duty to a man who explained that if he had to serve, 22 men working for him, would be thrown out of employment temporarily. Jury service, said the judge, necessarily called for sacrifice, and only illness or death could be advanced as legitimate reasons for liberation from such service.

It seems to us the judge in this incident took a highly technical and not wholly practical view of the situation. There was but one man who could keep these 22 at work, and no doubt many men were available who would have served the cause of justice equally well as a member of this jury. It was surely a case where the theoretical obligation of all citizens to do jury duty when called upon might have been tempered by the urgent importance of permitting men to earn wages when they can find work.

Jury duty would be less unpopular if courts had a little more consideration for the comfort and convenience of jurors Most jurors serve at a financial sacrifice. They are guarded like prisoners, reprimanded publicly if late for roll-call, kept together for days at a time in important criminal cases. No doubt all this is necessary, justified by experience. But often men on the jury panel are compelled to remain within call when they might be released for a day or two; or, as in the case we have mentioned, forced to serve when there is excellent reason for release. A little more thought for the individual would make for greater smoothness in operation of this part of the judicial machines.—Ottawa Journal.

Who Gets the Four?

Matter Of Discount On Canadian Dollar Is Confusing

Some confusion is apt to arise from the varying quotations on New York funds and the Canadian dollar. At times the quotation is given as premium on New York funds and at other times it is the discount on the Canadian dollar. A Canadian who goes to New York with $100 and asks for United States money for his own may find the discount on his funds as high as 20 per cent., and he receives $80. If he returns home without spending his $80 of American money and the rate is the same, he receives only $96 in Canadian funds. In order to get back his full $100 the premium would have to be 25 per cent. Who gets the other $4?

Advice Worth Trying

If your spectacles become clouded with moisture when you enter a warm room on a cold day, try backing in through the door. The editor of the Alva Review-Courier sought scientific advice in this matter and obtained the foregoing suggestion. He says it works.

The native population of Australia has declined from about 300,000 in 1788 to 62,000 in 1930, or 80,000 if half-castes are included.

The annual catch of whales in the Antarctic exceeds 10,000.

No Order Too Small

London Foundry Has Been Casting Bells For Centuries

Bells for the new carillon in Hamilton Cathedral, Canada, are now being cast at the ancient bell foundry in Whitechapel, London, England, where the craft of casting has been handed down from father to son for generations. The men here can cast any kind of bell. They cast the chimes for Big Ben. And they will take orders from muffin men, or make bells for cattle.

The courtyard of the foundry dates back to the fifteenth century. Bells that Queen Elizabeth must have heard, and the great cathedral bells of Canterbury, Winchester, Durham, and St. Paul's were all cast here. The craftsmen can calculate the note of a bell to a hair's breadth, even on so large a one as the greatest in the Hamilton carillon set, which is six feet, 4 inches across.

The men also make "hemisphere bells." These are flat-looking bells, intended for use in towers not strong enough to bear one of ordinary shape, or where a normal bell would not have room to swing. They are queer looking objects, but their tone is mellow and very beautiful.—London Correspondent.

Literature On Down Grade

Poor Quality Of Books Now Being Published

There never was a better time than the present for aspiring young authors but they seem to be coming forward slowly, in the opinion of Henry L. Mencken, noted author and editor.

Giving his views on the literary state of the United States he pointed out half a dozen books of excellent quality have been published during the last year, "but certainly there has been no such upsurging of really first rate newcomers as we saw in the first years of the century, and again in the first years of the war," Mr. Mencken added.

The American novel is in a very flabby condition and American poetry is almost dead, he thinks. The hard times have nothing to do with the matter. Publishers are turning out many books the same as ever but most of these are bad. A fault, he does not attribute to the publishers. They would print better ones if they could get them.

Principles Of Grading

Incentive To Quality Production Which Brings Better Prices

The grading of farm products as carried out under the administration of the Dominion Live Stock Branch is based on the principle that it is sound business to classify live stock and live stock products in such a way that the consumer will be able to recognize and purchase quality products, and that the price premium which the consumer will pay for the better grades should be returned to the producer of them. Practice has proven the value of the theory involved in the grading principle. Grading activities have been a tremendous incentive to quality production, with resultant price benefit to producers.

Denmark is considering the prohibition of over-time work.

FANCIFUL FABLES

All Efforts Made By Australia To Exterminate Rabbit Pest Have So Far Proved Unavailing

Result Is Encouraging

Boys and Girls Taking Great Interest In Farm Clubs

When in 1931 the organization of clubs for boys and girls on farms throughout Canada, under a Dominion-wide organization, was inaugurated, not even the promoters imagined such an encouraging measure of success would result. There are now 1,300 clubs with a membership of 21,822 in the Dominion. These clubs, under competent leadership, engage in the study of a variety of subjects relating to six projects, namely, dairy cattle, beef cattle, swine, poultry, grain and potatoes. The administration of the clubs comes under the Canadian Council on Boys' and Girls' Club Work, on which are representatives of the Dominion and Provincial departments of agriculture. The objects of the council, as officially described, are, in part, to develop and maintain a national boys' and girls' agricultural policy in Canada.

Since the formation of these clubs there has been among the members a great interest in raising pure-bred stock and other farm products, and at many of the agricultural fairs in all the provinces this year the exhibits of the boys' and girls' clubs has been a popular attraction. One of the prizes offered to the winners in the elimination contests is a five-day visit to the Royal Winter Fair held annually every November in Toronto. This fair is the classic event of its kind in Canada. Only members of the clubs between 16 and 20 years of age are eligible to enter the competitions, the first award for which is the trip to Toronto with all expenses paid. For the members between 13 and 16 years of age other prizes are offered. Inter-provincial club contests are also a feature of the movement.

It is easy to visualize the important contribution to Canadian agriculture that is being made by arousing the practical interest of thousands of boys and girls throughout the length and breadth of the Dominion.

Eleven Denominations Attending One Church

Creeds Are Forgotten and "Soo' Congregation Works In Harmony

In these days of exhortation for people to stand together possibly the most glowing example of 100 per cent. co-operation in the Dominion of Canada is to be found in All Peoples' United Church at Sault Ste. Marie, Ontario. It is a unique institution, perhaps not orthodox in principle as applied by other denominational churches, but it attracts eleven denominations and people of all races, who find here healing of all wounds, be they spiritual or physical.

When children of 11 nationalities foregather, when they have a good time, learn the good things of life in a pleasant friendly environment, it is not long before the parents, if they do not already belong, become interested.

There are English, Ukrainian, Polish, Croatian, Russian, Syrian, French, Italian and Australian, all gathered together. There are those brought up in the faith of the Lutheran, Greek Orthodox, Roman Catholic and all the Protestant denominations. The All Peoples' Church makes no effort to work along strictly denominational lines—it would possibly be fatal to its aims. They take the people as they find them—welcome them and do them good. If they want to join in the sports or social activities of the church, but follow their own religious inclinations they are welcomed just the same and take their place, generally giving unusually good account of themselves in various branches of the church's activities.

They help as they are helped. And among the members is wonderful musical and dramatic talent. There is a Croatian orchestra, a Ukrainian orchestra, and there are talented individual musicians and vocalists of all races and creeds. They often play and sing at other churches of the city.

Put Up Or Shut Up

When it is hot and one wishes to sleep near an open window, it is his privilege, according to a judge in Berlin, Germany, but the sleeper cannot control outside noises. A Berliner brought an action to suppress noises which disturbed his slumber. The judge said he could either put up with them or close the window.

These Chessman Are Old

Believed to be about 3,600 years old, an almost complete set of chessmen has been found at Vinche, 10 miles from Belgrade, Jukoslavia. The pieces are made of marble, baked clay and various stones. The discovery was made by Belgrade University excavators.

Motor accidents in the United States cost American insurance companies $500,000,000 last year.

Oddly enough, when we send it by ship it is a cargo and when it goes by car it is a shipment.

"The problem facing Australia at this time is the great army of rabbits with which the continent is infested," said the Hon. T. S. Gordon, of Sydney, passing through New York on his way to England with his daughter, Miss V. E. Gordon. "We are trying in every way to cut down their great numbers, but they multiply so quickly that our efforts to decimate them make no noticeable reductions in the furry tribe. There are still hundreds of millions of them. A pair of rabbits will produce six litters of young ones in a year and each litter will average five rabbits. As soon as the bunnies are six months old they begin to breed. In five years a single pair of rabbits will increase to ten million pairs. Seven rabbits eat daily as much food as would keep one sheep."

Rabbits were first brought to Australia by a farmer near Melbourne, according to Mr. Gordon. He wanted something to remind him of home and the good old English sport of chasing the hare. He sent to England for a pair of rabbits and in due course they arrived He turned them loose. In a year or so he could go hunting with considerable success. He soon found, however, that the rabbits multiplied so rapidly that his section was overrun His pasture disappeared. He sought to wipe them out, but they increased by hundreds then by thousands. There was nothing left for his stock to feed on, so he had to get rid of it, many of his cattle perishing on the bare fields nibbled to the earth by the rabbits. Thus rabbits ate him out of house and home.

Passengers on the "Carinthia" cruise around the world via the Southern Hemisphere which leaves New York next January will be driven to the country sections outside Sydney where they may view rabbits in hordes—also the methods being employed to destroy them. Poisoned food and water kill many of them. Rabbits killed in this manor are skinned and then the bodies are burned. One dry year as many as three million rabbits were killed by poison at one water hole. The payment of bounties proves effective and gives a good living to many men.

Rabbit-proof fences are proving successful. Some of these fences are hundreds of miles long with gates at intervals of a mile or more. There is a heavy penalty for leaving one of these gates open. The rabbit fences of Australia would reach several times around the earth.

Two hundred cats—foes of rabbits—were turned loose in Western Australia to combat the pest in that part of the country. The cats fraternized with the rabbits, living with them on the friendliest of terms. Foxes were introduced with the same purpose in view but they multiplied and killed sheep instead of rabbits. They are now fenced against.

New South Wales once offered a reward of $125,000 to any one who would suggest or invent a means for the extermination of rabbits throughout that state. It was never claimed.

Present Day Opportunities

Goods At Prices Now Prevailing Should Sell Readily

The low prices now prevailing on practically all kinds of goods represent a wonderful buying opportunity for our people. The idea that goods could be sold at such prices would have seemed preposterous three years ago. It may seem equally impossible three years from now that goods were sold in 1932 at these figures.

The people are making a mistake if they do not buy freely when such bargans are offered. But the public will not fully realize the value of these opportunities unless the detailed facts about them are constantly told through advertising. Goods at present prices ought to sell readily if well advertised.

Hint Was Broad Enough

Queen Victoria Gave Shetland Pony To Famous Dwarf

An amusing story concerning Tom Thumb, the famous dwarf, is told by Bob Sherwood, "the last of Barnum's clowns," in his newly-published volume of reminiscences entitled "Hold Yer Hosses."

When the great little man appeared before Queen Victoria she asked him to sing.

He obliged with "Yankee Doodle." Each time he came to the line, "Yankee Doodle came to town on a little pony," Tom would glance longingly through the window at a very small Shetland pony that was grazing outside, for the tiny horse just suited Tom's size. Her majesty took the hint and Tom rode home in triumph.

Crevices Form Cross

The famous cross of snow in the Holy Cross National Forest of Colorado is formed by two snow-filled crevices on the side of the mountain. The cross is visible for miles.

It does seem a shame, since Germany is too poor to pay her debts to deny her the right to spend a few billion for armament.

DEPRESSION PRICES

Doylestown, Pa., Jan. 5—A sheriff's sale of farm property in which horses brought three cents, a bull five cents and three pigs the same amount, left Buck's county authorities puzzled today.

Representatives of the recently organized Farmers' Protective association said they attended the sale to offer low bids.

The total sales included a flock of chickens for three cents, a pair of calves for four cents, and Hansel's household goods for six cents.

None of the property was removed and after the sale a collection was taken up to buy food for the farmer's three motherless children.

"Mac's Best" No. 1 Patent Flour—per 98 lb. sack $1.38. Every sack Guaranteed. W. J. Trott.

The I.O.D.E will meet at the home of Mrs. Laughlin, on Monday night next.

One good three-year-old heifer, just fresh for sale. A. Gilmour.

Mr. and Mrs. F. C. Owen returned this week from a holiday visit to friends in B.C.

We're Overridden With "Inspectors"

Just as we are settling down and becoming resigned to "the depression," along comes another of the dozens of "inspectors" from Government of Alberta, who proceeds to take the little joy that is left out of life. The inspector is from the Compensation Board, and requires that all business places overhaul their electric wiring, instal switch boxes, and make other changes. Why pick on this year to ask for these most expensive changes? It costs anywhere from $50 to $100 to put the average business up to the standard asked by Mr. Inspector. We would ask our council if it is reasonable to impose this burden on our ratepayers, and if it would not be in order to have the matter taken up with those in power at Edmonton.

The wiring of the town has been done in most cases under rigid inspection by qualified electricians, and passed by the Fire Underwriters. This certainly should be sufficient guarantee that it is properly done. That it is properly done is borne out by the fact that there never has been a fire in Lacombe that was caused by defective wiring.

Inspectors, of course, appear to be a necessary evil, but in Alberta this branch of the government seems to be overdone. And in many cases these inspectors have caused needless hardship. Take the minimum wage inspector. After the last visit of this inspector, two or three young women who were working for wages lower than the minimum set by the government, due to the fact that their employers found that they could not pay the price set, but were reluctant to turn them off and add them to the unemployed, but who were willing to pay them what could be afforded, found themselves out of a position. The employees were quite willing to take the lower wage—we're all doing it—but the inspector said it was not allowable. So the ranks of the unemployed were swelled to that extent.

Then there are dozens of other inspectors—but why say more—you know all about them.

SENATE COMMITTEE VOTES FOR REPEAL

Washington, Jan. 5—The U. S. Senate judiciary sub-committee charged with study of prohibition repeal proposals voted Thursday for repeal of the controverted amendment.

Acting with unprecedented speed, the committee, headed by Blaine of Wisconsin, agreed to report a repeal resolution for submission to state legislatures with protection for dry states and authorization for congress to legislate against return of the saloon.

RIMBEY FARMER FOUND DEAD

Carl Haugerud, aged about 60, of Springdale, 15 miles northeast of Rimbey was found dead in his shack on Monday, January 2.

A neighbor, Lawrence Huff, had visited him on Saturday and learned he had influenza. He saw smoke from his house on Sunday but did not call until Monday and found him dead.

Haugerud had lived in that district for about 25 years.

The body was brought to Rimbey on Tuesday by Mr. Huff. Burial was made at Rimbey today.

FATAL SHOOTING ACCIDENT AT RIMBEY WEDNESDAY

A young farm boy of the Rimbey district was accidently killed yesterday afternoon while hunting with his brother 6 miles west of Rimbey. Only 14 years old, the son of Herman Bryanton was fatally shot when he and his brother were exchanging rifles.

The Western Globe Celebrates Twenty-Seventh Birthday

This week marks the commencement of the Editor's fifty-first year in the West, and incidentally the twenty-seventh year of publication of The Western Globe by the Halpins.

Coming to Manitoba in 1882, we have seen the west grow with interest. At that time Winnipeg was a small town of wooden shacks and tents, not to forget the mud. Brandon was just a few tents, and was the end of track of the C.P.R. Other western towns had not been thought of until Calgary was reached, and at that time Calgary was little better than a trading post. Looking back one is surprised that even in fifty years such expansion could take place, and that cities of hundreds of thousands population now stand on the old village sites.

The Editor of The Western Globe started on his journalistic career in Winnipeg, and for the promise of $2.50 weekly acted in the capacity of office boy, press feeder, roller washer, etc., and occasionally wrote a local to the effect that "so and so had erected a nice picket fence about his premises." It was hard work, but we could see ourself as a great moulder of public opinion in the Dominion and kept on for a time. In those days we got board and room for $2.00 a week. Needing a little cash, however, we took the opportunity to secure a job driving a freighting team for one of the contractors, on the C.P.R. construction, and for a year or two hauled supplies to the camps on the prairies and through the Rockies over the old "tote road." Coming to the conclusion that when the rails got to "Beaver Mouth" in the mountains the rest of the 'hands' could finish the building of the railway through to Revelstoke, we again started for the East—Winnipeg, and with the exception of a few months we took off to put down the Riel rebellion in 1885, with the assistance of the Mounted Police and a few battalions of troops, have continued in the publishing business until today.

The first fifty years were probably the hardest we'll have to put in, and we look forward with confidence to the next half century. We love the West and will probably settle down here. Another thing buoys us up—we will soon be eligible for the old age pension.

At this time we wish to thank the businessmen and citizens of town and country for the very liberal patronage given us during our twenty-six years in Lacombe, and wish everyone a prosperous and happy New Year.

THEY STILL FALL FOR IT

There is a nice little alleged advertising scheme under way in Alberta just at present, and those putting it over expect to reap rich rewards. It is a scheme by which Mr. Businessman donates $15.00 and gets a nice bunch of cards with figures on them. He gives the cards to the youth and beauty of the towns, who write in their names, and ask their friends to deal at the business place whose name is on the card. Credit is given the boy or girl for all purchases, and in a certain time the boy or girl who receives the most 'votes' will get a real bicycle. Now a real bicycle costs about $25.00, and the cards costs a very few cents, so the promoters will probably be able to "keep the wolf from the door" during these strenuous times—that is if the businessmen of the Province fall for this scheme to any great extent.

CALVIN COOLIDGE DEAD

A flash came through at noon today that Calvin Coolidge, a former President of the United States had died suddenly today from a heart attack.

Maintaining A Long-Established Position in Canadian Banking

When the Dominion of Canada was established in 1867, the Bank of Montreal, then already half a century old, had nearly a fourth of the total paid-up banking capital of Quebec and Ontario, and more than a fourth of the banking assets of those two provinces.

Today it has the same proportion of the capital and assets of the banking structure of the entire Dominion.

Today, as yesterday, it employs its resources and facilities for the upbuilding of the soundest elements of Canadian business.

SCRIP EXPERIMENT PLEASES RAYMOND

The Town of Raymond, Alberta, was so pleased with the results of its adventure into scrip last year that it is thinking of issuing twice as much in 1933, according to a report from officials of the southern centre. Raymond, it was said, issued $12,500 worth of script last year. Of this total, $122 had not been redeemed at the end of the year.

Miss Gladys Jameson left on Monday for her school at Hythe, Alberta, after spending the Christmas Holidays with her parents here.

FATHER OF SIX KILLS HIMSELF

Blairmore, Jan. 4—Frank Anatto, aged 59, father of six children and one of the old timers of this town, committed suicide shortly after noon Wednesday by blowing the top of his head off with a shotgun.

Coroner Turner, of Bellevue, viewed the body and decided an inquest was unnecessary. Motive for the act remained a mystery. He was employed by the Western Canadian Collieries, Ltd., here.

The man went to the pantry, talking to his wife and children and there fired the shot that ended his life.

F. E. McLeod - - - Lacombe

WORLD HAPPENINGS BRIEFLY TOLD

Seventy-two railway freight cars of Christmas trees have this year been shipped from Vancouver Island to all parts of the United States.

A Japanese government spokesman declared that resumption of diplomatic relations between Russia and China was most unwelcome to Japan.

For the first time Canada will be host to 31 countries which participate in the Pacific science congress in the summer of 1933.

St. Nicholas, the traditional original of Santa Claus, was feted throughout Italy December 6, on the 1580th anniversary of his death.

Documents indicating that the North American continent was discovered in 1452 by the Portuguese navigator, Pedro Vasquez de la Montera, have been discovered.

The king took two firsts and a second prize with three-year-old red polled heifers at the annual pre-Christmas fat cattle show at Norwich, England.

Finding that cattle hides could not even be given away, a Ukrainian settlement in Alberta plans to establish a tannery and a shoe factory in the near future, G. W. Sikevich told an audience at Winnipeg.

The board of railway commissioners has no jurisdiction to make contributions from the grade crossing fund to works which do not eliminate the crossing itself, the supreme court of Canada has decided.

Somewhat resembling a moratorium legislation is being considered by the Alberta Government to aid farmer debtors, it is learned. It is expected the legislation will be placed before the legislature when it opens some time in January.

Disregarding friendly advice of Great Britain, Japan instructed its delegation at Geneva to reject the proposal that an international conciliation commission be created to attempt a settlement of the Chino-Japanese controversy over Manchuria.

Cathedral Erected On Floating Island

One Reason Why Cracks Appeared In Masonry Of St. Paul's

A few weeks ago was celebrated in St. Paul's Cathedral a service in commemoration of the three hundredth anniversary of the birth of Wren, who built this and so many other beautiful churches in London, England.

Only a year or two ago there were many who feared that St. Paul's was doomed. Great cracks appeared in the masonry, and it was doubted whether anything could be done to save the great church. Thanks largely to the efforts of Canon Alexander a vast sum was raised by subscriptions, and St. Paul's is now safe for many a year to come.

Wren did not know that he was erecting this gigantic building upon what is really a floating island. Only in recent years it has been found that the whole of the central part of London is sinking very slowly. Far beneath it is a great subterranean lake whose waters are collected in the Chilterns and other hills surrounding London. Millions of gallons are drawn daily from this lake by means of artesian wells, and London's floating island sinks a little.

Another trouble beneath St. Paul's was that the foundations rested upon a bed of sand which had begun to move. A tremendous work of underpinning was necessary. Safeguarding St. Paul's is, perhaps, the best of all tercentenary tributes to its great architect.—Tit-Bits.

A Renowned Detective

"Camera-Eye" Dan McLennan Was Native Of Nova Scotia

"Camera-Eye Dan," for years considered the sharpest detective on the western coast of United States, was a native of Nova Scotia.

Dan J. McLennan was his name, and he was born in Victoria, N.S. At his death citizens of Seattle mourned the loss of their "greatest insurance against crime." Criminals and down-and-outers said: "He was a square shooter!"

McLennan contributed his share toward the solution of some of the most mysterious crimes recorded in the western states, but it was as a "memory man" that he became famous. Faces, names, numbers and dates made indelible impressions on his mind.

He died in 1928, following an operation, and was buried in Seattle beside his partner of 10 years, James Doom. His mother, two sisters and two brothers live in Nova Scotia.

Highlights of the noted memory-detective's career were sketched in a mysteries magazine.

"Boss, the whole building has tumbled down."

"Didn't I tell you not to remove the scaffolding until the walls were papered?"

Newspapers of England have been featuring the fact that King George has had the same collar stud since he was a boy.

Wimipeg Newspaper Union Fashions

By Ruth Rogers

SUCH A HOST OF DELIGHTFUL NEW STYLES FOR THE WEE ONES—AND HERE'S A DARLING

It has the fashionable wide shoulders.

It has simple smartness that marks the little Parisienne's clothes.

It's double-breasted to assure warmth. And don't you like the way it buttons right up to the neckline? The turn-over collar is comfy besides being smart.

You can make it in an amazingly short time.

Light hyacinth-blue soft woollen made the original French model. It's so unusual and new looking, and quite practical besides.

A tiny check woollen in soft brown with beige is cunning scheme.

Style No. 955 is designed for sizes 2, 4 and 6 years.

Size 4 requires 1¼ yards 54-inch with 1¾ yards 35-inch lining.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

New Uniform

British Tommy To Be Clothed In More Comfortable Fashion

The Dominion troops set an example to the Old Country during the war of uniforms giving utility and comfort rather than parade ground smartness. The new uniforms intended for the British army which were shown in London by the war office are more easy wearing than anything conceived of before. They suggest Boy Scouts and week-end hikers more than the old-style of His Majesty's regiments.

The cap is not the stiff, peaked variety, it is a hat with wide brim giving shade to eyes and neck and it is of a soft material and can be rolled up and put in the pocket. It has no chin strap or other kind of fastener and one imagines that if a line of soldiers are on parade every hat will be at a different angle and every brim will be flapping in the wind.

Instead of the tight tunic with thick collar buttoning close up the neck the new jacket is loose fitting and has an open neck. It has pouch pockets and the buttons are of gun metal instead of brass which needs to be polished.

Most Beautiful Words

List Of Ten Selected By New York Poet

Wilfred J. Funk, poet and dictionary publisher of New York, lists what he considers the 10 most beautiful words in the English language—"beautiful in meaning and in the musical arrangement of their letters."

His list compiled after a "thorough shifting of thousands of words," follow: Dawn, Hush, Lullaby, Murmuring, Tranquil, Mist, Luminous, Chimes, Golden, Melody.

"The long vowel sounds and the soft consonants make these words flow smoothly," Mr. Funk said.

Still Sing "God Save Queen"

An English sailor, William Masters, migrated to Palmerston Island in 1862, taking with him three native wives. Now there are 100 descendants on the island. After 70 years of isolation, they still sing "God Save the Queen," for Queen Victoria was reigning when they got their first instruction in foreign affairs.

Club Bore: "Is the seat next to you reserved?"

Member: "Yes. In fact, I am happy to say it hasn't said a word since I've been here."

Australian Receives Award

Hinkler's Crossing Of South Atlantic Most Noteworthy Flight

A trans-Atlantic flight accomplished a year ago, one of the greatest individual achievements in the history of aviation, is recalled in the announcement that the Johnston Memorial Prize for this year has been awarded by the Guild of Air Pilots to Squadron Leader H. J. L. Hinkler.

It was on Nov. 26, 1931, that the tough little Australian pilot, who had already established new records during a flight in long hops from New York to Port Natal, Brazil, set his little "Puss Moth" cabin monoplane at the crossing of the Atlantic Ocean. No aeroplane had ever traversed the 2,000 miles of the South Atlantic from west to east; no light aeroplane had got safely across. Hinkler aimed to make landfall at Bathurst, in the Gambia. For 22 hours he fought his way through terrific rain and thunderstorms, and the immense cloud formations that overhung the sea. Six hours he spent flying a few feet off the water below clouds that raced by just overhead; six more hours, and those during the night, he battled through cloud banks at heights up to 12,000 feet, his outward vision completely blanketed and his only guide the two compasses and his own rare instinct for direction.

When the fuel remaining in the tanks would have been enough only for another two or three hours in the air, Hinkler crossed the African coast ten miles south of Bathurst, his objective, turned north and landed on the Bathurst flying field. The close approximation of the landfall to his predetermined objective is noteworthy after a sea crossing of such length.

The Johnston Prize is offered each year for the best feat of aerial navigation in memory of Squadron Leader E. L. Johnston, the much-loved navigating officer of the ill-fated airship R-101. Last year it was awarded to F. C. Chichester, a New Zealand amateur pilot, who shaped successful courses in his own light aeroplane over more than 500 miles of open sea between islands in the Southern Pacific by means of solar observation.

Four Acres Of Windows

Glass Used For Walls Of Chemists' Building In England

"Walls all windows" is the way Londoners refer to an outstanding example of modern architecture of the "mushroom" variety in the new building being erected for the Boots firm of chemists at Beeston, Nottinghamshire. When completed it will be the largest reinforced concrete building in England.

Sir E. Owen Williams, eminent consulting engineer, was responsible for planning the new building. In doing so he said he had aimed at the reduction of human effort. Except for the steel trusses supporting the main hall roof, the structural work of the building is all in reinforced concrete. It has no walls in the ordinary sense of the term.

"Are walls really necessary?" Sir Owen seems to have asked himself, and to have replied, "No, but windows are." The "walls" therefore, are large glass windows—four acres of them. The entire structure is built on the unit principle—a mass production plan, made up of "repeats" which saves the designer and the contractor a lot of work and Messrs. Boots a great deal of money.

The main hall, the chief feature of the building, is now 580 feet long, but will be extended when the building is finished. The floors are constructed on the "mushroom" principle, that is like great tables (with centre legs) placed side by side. The roof is carried on steel trusses of 69 feet span, the covering being of concrete slabs 1⅜ inches thick, in which are fixed bulls-eye windows of special design so that they can be readily replaced from the outside if broken.

Cheapening the Dollar

United States Senator Favors Temporary Suspension Of Gold Standard

United States Senator Ellison Smith, Democrat from South Carolina, told newspapermen he favored a "temporary suspension" of the gold standard by the United States to "cheapen the dollar and increase commodity prices."

As an example, he said cotton was selling for 11 cents a pound in Liverpool, but that this meant only five cents in the United States by the time exchange had been made.

"Cheapening the dollar by suspending the gold standard temporarily," Smith concluded, "would raise commodity prices and aid the farmer and industry."

An Intelligent Plant

If the Venus flytrap plant of Carolina has been induced to shut on something it doesn't want, it opens again quickly, and when it has been cheated two or three times in succession, the plant ceases for a time to respond.

She—"You think more of that old wireless set than you do of me."

He—"Well, I get less interference from it."

There is no word for kiss in the Japanese language.

NEW YORK'S EX-MAYOR IN FRANCE

Former Mayor James J. Walker of New York, is shown with Miss Betty Compton, well known musical comedy star of Broadway, as they enjoyed the sea breezes on the rocks at Cape d'Antibes, popular resort in the South of France. The ex-Mayor is planning to write his memoirs after he has had a long rest.

A Strange Occupation

Science May Do Away With Smoke Watchers In England

Smoke watching, one of Britain's strangest occupations, is declining.

Imperfect firing of boilers makes for soot-laden air, and many firms send old employees to the roofs of power stations and factories. They sit with a piece of mica glass in their hands, and when they can see smoke through the dark glass they signal the boiler-room and the fuel supply is cut down.

Scientists, however, have perfected a device by which, if smoke becomes too heavy in a chimney, a warning bell is sounded and the boiler-room attendants know they have been firing too heavily.

The smoke watchers, whose profession is threatened by this device work in eight-hour shifts, day and night, rain or sunshine.—Answers.

Life Has Been Exciting

Former British War Secretary Has Always Lived Dangerously

Major-General, the Right Hon. Sir John Seely, former Secretary of War and Under-Secretary for Air, attained his 64th birthday recently, much to the surprise of everyone, especially himself. He has always lived dangerously and has had many hairbreadth escapes. Among his many thrilling experiences are falling a sheer 200 feet down a cliff, facing a hostile rifle at 15 yards, when a miss seemed impossible, and escaping from a 'plane when the pertol tank exploded at an altitude of 4,000 feet. His book of personal adventures makes exciting reading.

Holland Solves Difficulty

The aquarium at Amsterdam, Holland, has the reputation of being the only one which has been successful in housing a school of herring. The difficulties in keeping these fish in aquarium quarters, it is said, is that they bump into the rocks at night and kill themselves. Officials at the Amsterdam aquarium have overcome this obstacle by providing the herring with a night lamp.

Have Been Working Overtime

Egg-Laying Contests In England Show High Average

British chickens have been working overtime this year. Reports of the 1931-32 egg-laying trials show that both averages and individual records are higher than in previous years.

For instance, 3,300 pullets entered in the national test at Milford, Surrey, returned an average of over 185 eggs per bird for 48 weeks. Four pullets laid over 300 eggs each, the highest score being 318 and the best, having regard to quality as well as quantity, being 314.

But the most amazing record of all had nothing to do with the tests; it was set up, quite involuntarily, by a hen which wandered into the line of play while a game of golf was in progress, and was hit by one of the balls. It jumped high in the air and then, when it came down, laid six eggs in rapid succession—two with shells and four without.—Answers.

Spanish Cabinet Criticized

But Republicans Come To Defence Of Author Members

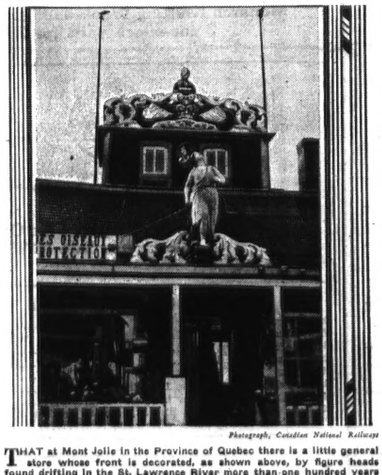

Criticism of the new Republican cabinet of Spain on the ground that half of its members are authors has brought a reply from champions of the new regime. They declare that Blasco Ibanez, the novelist, with his many political activities proved that all authors are not always dreamy and impractical persons. They also point out that Premier MacDonald of England, Mussolini, Lenin, Trotsky, and others were journalists before they became powers in their countries.

Vine Hard On Tires

California is spending $150,000 a year to rid the state of a vine that is a costly pest to motorists. It is the "puncture vine," a creeping plant which, when crossing a road sends its sharp spines through an automobile tire.

Beavers have laid wate stretches of woods near Mandel in Norway.

+ Do You Know? +

Photograph, Canadian National Railways

THAT at Mont Jolie in the Province of Quebec there is a little general store whose front is decorated, as shown above, by figure heads found drifting in the St. Lawrence River more than one hundred years ago, following the wrecks of wooden ships? The figure on the top of the building is believed to be from the bridge of a French Admiral's ship and the lower figure is from a Swedish barque and represents a Scandinavian princess. The medallion in the center is the head of General Wolfe, conqueror of Canada. The owner has refused many thousands of dollars for these curiosities.

Canadian Tobacco Exports

Canadian Grown Tobacco Is In Great Demand In the British Isles

Tobacco grown in Canada is becoming more popular among smokers in the British Isles, who are notable for their discriminating taste in the weed Exports of Canadian tobacco from January 1 to October 31, 1932, totalled 9,056,360 pounds to the British Isles, a considerable increase over the total amount shipped to the British market in 1931 and more than three times as much as sold there in 1930. Canadian bright flue-cured tobacco is the principal variety demanded by buyers in the British Isles. This is grown in Southwestern Ontario.

As a result of trade agreements between Canada and Britain, which were drafted at the Imperial Economic Conference held in Ottawa last summer, it is expected that more Canadian tobacco will find a market in the Old Country.

Tobacco production has greatly increased in Canada in recent years. In 1931 the total production was 51,300,000 pounds from 55,060 acres. In 1921 the total production was only 13,249,000 pounds from 11,809 acres. Figures for the 1932 production are not yet available, but a preliminary survey indicates it will be about the same as in 1931.

German Shepherd Dog

Ancestry In Present Form Dates Back Nearly 8,000 YeYars

Although there are persons who still insist that the German shepherd dog is part wolf, this statement was long ago emphatically discredited by Albert Payson Terhune, noted writer of stories about dogs. "All dogs are descended from the wolf or some wolf-like animal," Mr. Terhune said. "But the German shepherd dog traces his canine ancestry back, pure from any wolf strain, for perhaps a longer period than does any other modern dog. From bones and fossil remains. Stephanitz has established the fact that the German shepherd dog existed in practically his present form in 5700 B.C., nearly 8,000 years ago."

Recipes For This Week

(By Betty Barclay)

SUGAR COOKIES

2½ cups special cake flour, sifted.
2 teaspoons baking powder.
½ teaspoon nutmeg.
½ cup butter or other shortening.
1 cup sugar.
2 eggs, well beaten.
Grated rind 1 lemon.
1 tablespoon cream.

Sift flour once, measure, add baking powder and nutmeg, and sift together twice. Cream butter thoroughly, add sugar gradually, and cream together until light and fluffy. Add eggs, lemon rind, and cream, and beat well. Add flour, a small amount at a time. Beat after each addition until smooth. Roll into thin sheet on slightly floured board. Cut with floured cooky cutter and dredge with sugar. Bake in hot oven (425 degrees Fahrenheit) about 7 minutes. Makes 2½ dozen cookies.

PUMPKIN CUSTARD

½ cup stewed and strained pumpkin.
1½ cups milk (or 1 cup milk and ½ cup light cream).
1 package vanilla junket.
¼ teaspoon cinnamon.
½ teaspoon ginger.
¼ teaspoon salt.

Mix pumpkin with salt, ginger, and cinnamon. Add milk, or milk and cream and stir thoroughly. Warm mixture to lukewarm (110 degrees Fahrenheit) **Not Hot,** stirring constantly. Remove from stove and add junket powder. Stir briskly not more than one minute. Pour at once into individual dessert glasses. Let stand until firm—about 10 minutes. Chill and serve. Whipped cream may be added as topping if desired.

Travels Down and Up

Diver Goes In For Aviation As a Diversion

E. E. Bailey, of Houston, Texas, is an extremist. A deep sea diver by trade, he flies for diversion.

In the morning he works under water on the hulls of ships, and in the afternoon he goes to the airport and flies.

"One of these days I am going to own an amphibian 'plane," says Bailey. "Then I can really mix water and aviation."

Must Supply Own Books

Pupils of public schools in Glasgow Scotland, will not have free school books unless they are too poor to buy them. A sub-committee recently recommended supplying the books to all pupils next year, but the town council has voted down the plan.

The difference between talk and conversation is that the latter is listened to by others beside the speaker.

Elk Island National Park, Alberta, contains about 700 elk, 1,000 buffalo, 550 moose and over 200 deer.

An odorless onion is cultivated by the Chinese.

Relief Commission

Saskatchewan Body To Accept Responsibility For Unemployed Girls

The Saskatchewan relief commission accepts full responsibility for single girls physically able to accept positions on farms, once they are placed.

This is the interpretation placed on the agreement forwarded from Ottawa following a series of conferences between provincial government and relief commission officials, and was given by C. B. Daniel, general manager of the Saskatchewan relief commission.

The commission assumes no responsibility for such persons until they are actually placed. They remain a charge on the municipality, town or village until such time.

The commission is empowered, pending placement, to pay to accepted organizations such as municipalities and relief committees, the actual cost of food and shelter for single homeless unemployed men and women, physically fitted to accept work on farms, or in the case of men, to enter a concentration camp, providing such aggregate food, clothing and shelter allowance does not exceed 40 cents per man-day.

Ottawa has been wired by the commission seeking clarification on the question as to whether single unemployed girls may be placed in city homes under the government assisted scheme, and also whether the commission may place them with organization such as the Y.W.C.A. and pay up to 40 cents per day for their keep.

Wireless Telephony

Will It In Time Supplant the Old Morse Code?

Wireless telephony has swept away much of the usefulness of the Morse Code. And now comes the news that its place in the British post office telephone system is being taken by the teleprinter.

But I think it will be a long time before they kill the romance of the Morse Code in the public eye.

The first words ever tapped out by Morse were, "What hath God Wrought?" They were sent from Washington to Baltimore on May 24, 1844, by Samuel Morse, whose electromagnetic telegraph was regarded as a wild scheme—until he succeeded.

The most important message next transmitted was from a ship in distress—the "C Q D" which signified "Come Quickly, Danger."

But nowadays if an airman is in distress, he does not send out an "S O S." He just speaks the word "Mayday" into his wireless telephone. That word is said to be a corruption of the French "M'Aidez" (Help Me).

No Premium On Gold

Vancouver Banker Had Edge On United States Citizen

A United States citizen presented some bills, silver dollars and several $5 gold pieces of his country's currency at a Vancouver bank. He got 19 cents premium on the dollar for his bills, eight cents on his silver and nothing on his gold.

He protested against the discrimination against gold in favor of paper, but the banker explained: "Your gold pieces are worth no more to us than Canadian gold pieces of the same face value. We will give $5 in Canadian bills for a $5 Canadian gold piece, and we can give no more for an American gold piece of the same amount."

"But I thought you were paying a premium on gold?"

"On raw gold from the mines," replied the banker.

"And, by the way," stated the banker, "you will have to leave the gold here now, because it is illegal to take gold out of Canada without a Government license."

Watch Returned By Thief

Accusing Ticks Have Bothered Him For Thirty Years

For 30 years a watch has ticked the guilt of a man of Dusseldorf, Germany. Unable to stand the accusing ticks any longer the thief has just sent it to the police anonymously with a note explaining that he had taken the timepiece from the table at the bedside of a sleeping man. He added that he hoped the man was still alive because it was certain that the robbed one would be as pleased to get the watch as the writer was to get rid of it.

Did Not Produce Results

A survey conducted by Editor & Publisher shows that the concentrated radio campaign in the closing weeks of the presidential election race was ineffectual in winning votes. In fact, the only difference the broadcasting barrage made was to send the people to the polls with a bigger earache than ever before.

Side Line For Fishermen

Fishermen during 1928 made a gross income of $134,000 through the sale of 2,344,000 pounds of fish scales. These were sold to paint manufacturers for use in "pearlescence" paint.

Teacher: "Can you tell me the kind of illumination they had on Noah's boat?"

Little Tommy: "Arc lights."

GENUINE

ACTON'S STOMACH TABLETS

This is the original. There is no other genuine Acton Stomach Tablet on the market.

Don't let Stomach Distress continue to make life miserable for you.

THOUSANDS ARE BETTER

After a course of treatment with Acton's Famous Stomach Tablets. Acton's relieve while nature aids and cures.

CHAPTER III.

A Call To Vengeance

During that dash down the Mackenzie, Alan's thoughts were not enviable. . . . "They used Margaret Fournier as a means of making their getaway from the steamer. It worked so well then that they might try the idea again. They might try to capture Joyce and use her as a sort of hostage to protect themselves."

But somehow he did not greatly fear they would do this. He remembered the gun she always carried, his own gift to her on her twentieth birthday. A black automatic, a tiny thing like a toy, it nevertheless was blunt and effective as a terrier bulldog. That big-red-bearded bandit who had threatened to put a bullet "squar' a'tween" the eyes of Margaret Fournier, would likely get one between his own if he tried any brutality with Joyce MacMillan.

To Alan it seemed pretty clear that Bill in his haste and excitement had made a mistake about those men being strangers to every one aboard the steamer. It didn't look possible. They knew this country, knew it intimately. It took years to learn the ins and outs of so huge a region. But they knew.

Alan concluded: "They aren't strangers, of course. Bill just made a mistake."

Half-hidden between two blanket packs Constable Whipple sat fingering his rifle, peering ahead anxiously, as though at any moment he expected to meet the outlaw canoes here on the Mackenzie. Alan watched him with something of scorn in his eyes. Whipple was constantly spying upon the other men, listening with long ears, reporting everything that happened and a lot that did not.

Forty miles below Endurance, sweeping near to shore around a great bend, Alan looked ahead and sighted the Midnight Sun out in midstream, plowing steadily up south. At his gesture Pedneault swerved the launch and snubbed its headlong speed, and Bill began unlashing one of the canoes. As the two craft drew nearer, Alan rose up and signaled that he wished to come aboard the steamer. The boat stopped, a ladder was let down. Paddling across in the birch-bark, he and Bill hurried up on deck.

Margaret Fournier was safely back on board. Several of the men, hastily patching one of the smashed canoes, had followed up the Alooska a mile and found her on a willow island where the bandits had set her off.

When Alan came on deck, almost his first sight was of Jimmy Montgomery's little girl, perched upon a pile of cargo, showered with care and attention from every one. As he glanced at the tiny golden-haired tot, Alan thought of her mother dying less than a year ago, of her young father cut down today by an outlaw's bullet; and he had a swift vision of the bleak orphanage, the friendless and homeless life, which lay ahead of her, now that Jimmy was dead. He was not deceived by the attention she was getting now. Every one was all sympathy for her today, but that would cool mighty quick; and then she'd be thrown into some orphanage, maybe along with half-breed and Indian children. Alan thought, "She's Jimmy's child; Jimmy was my partner; it's up to me to do something about her."

With nothing more definite than this in mind, he directed Ashmun, the white-haired skipper "You put her off at Endurance tonight. Give her to Elizabeth. Say I'll be back in two or three days."

Following the old captain, he stepped softly, hat in hand, into the one well-fitted cabin of the steamer. He remembered Jimmy as a trail partner and a quiet gentle soul and the most utterly fearless man he had ever known. Stone silent he stood beside the bunk looking down for the space of half a minute, sick at heart, his eyes blurring. Why had it been Jimmy who was cut down?—a young man, a young father, the best and bravest of them all.

Then like a small whisper in his loss, a thought came, edged with pride in Jimmy and the manner of his death:

"You were the only one who drew a gun. You knew they'd kill you . . . a belt-gun against six rifles; but you stood up and shot. You were always that kind; and so was Curt. Now you're both gone; now I'm alone, of us three—"

The desolation was unbearable. Bill following, he turned and went out of the cabin, into the sunshine of the deck. A grim mood had come over him, a mood shot through with personal and deadly intention. He was no longer merely the stern and efficient representative of the law. Vengeance, a burning and righteous vengeance, had entered his heart.

With a dozen men crowding around to listen, he questioned Skipper Ashmun briefly.

"Bill said these men were strangers. That can't be. Didn't you recognize them at all? Haven't you got some idea who they were?"

"Alan, I positively never seen a man of 'em till I looked up and there they stood p'inting their weapons at us. And I see just about everybody that goes up and down the river."

"And they knowed the lay of the land like a book," another man spoke up. "That's the queerest part of it."

Alan was fairly staggered. Bill had reported accurately. The men were strangers.

How under heaven could six men enter this country unknown, unseen? Then, granting they had, granting them strangers, how did they come to know the lay of the land so perfectly?—where to strike, when to strike, how to escape by a straight shoot to their one superiative refuge, the Thal-Azzah.

In all his years of police service he had never met quite so dark a circumstance as this.

Joyce Tried to Pray That Alan Was Not Leading This Patrol.

As he and Bill went down the ladder, the rail was lined with people wishing them a quick capture, wishing the criminals a swift and speedy justice. Alan did not hear, did not care. But as he stepped into the canoe and with a shove sent it skirling toward the launch, he did hear one voice from some man on the steamer; and it rang in his ears like a croak of evil prophecy:

"Going after men like them, Alan Baker, you'd better take your luck along!"

* * * * * * * *

At the MacMillan trading post Joyce had lighted candles in the kitchen and trading hall. Though she hardly knew just when her father would return from his fur-buying trip, she had kindled a comfortable fire in his bedroom and had prepared a supper of scones and breaded mushrooms and willow ptarmigan which she herself had shot that morning.

As she stood tiptoe at a pantry shelf, away from the crackle and sough of the cook stove, she heard some peculiar noise somewhere out in the night. She went over to the window and there heard it more distinctly—a faint drone that rose and fell with the ground winds drifting out of the spruces.

The puzzling sound drew louder, plainer. Then suddenly Joyce knew. The police launch! Coming up the Big Alooska. Coming slowly because of the treacherous channel, but driving on through the twilight in spite of the danger.

That launch went out only on matters of importance. And this patrol must be very important, to bring the men up a perilous river at this hour.

Throwing a cape about her shoulders, she ran through the trading hall, out into the sharp pine-scented air, down to the canoe landing at the river bank.

As she stood on the mud-filmed planking, with the whispering breeze molding cape and dress closely about her vigorous young body, Joyce tried to pray that Alan was not leading this patrol. Her girlish pride was crying out that she did not want to see Alan Baker. Her rational mind was warning that it would be better for her if she never saw him again at all. But no pride or rationalising could beat down the secret throbbing expectancy of meeting Alan, of hearing his voice, in a few minutes more.

Through the whole long winter Joyce had been slowly realizing that her return to this northern Waterways country had been a terrible mistake. Once she had been away, free of it all. With the true instinct of colonial Britons for their children, her dad and mother had sent her out to school, a solid old English institution in Ontario. When she finished, she quickly hunted up a job for herself, a place with a government bureau, where her knowledge of Indian languages and customs made her uniquely valuable in preparing pamphlets for the far northern agencies. Independent, earning a good salary, with friends and sports and work she liked, she had given up all of it and returned to this isolated fur post on a sub-Arctic river.

Her mother had died, and her father, alone, crushed by the relentless competition of big companies out to "get" him, had morally gone to pieces. Alan in his letters had written her the sorry facts. Her duty, clear as a call, had spoken to her, "If you return, you may be able to stop that; you may help Dad back to where he was." And she had come.

She knew that other folk were surprised at her loyalty, and thought her foolish, and were shrugging shoulders at the hopelessness of a mere girl trying to lift Dave MacMillan above the whisky and Indian-woman life he had sunk into. But Joyce did not consider it foolish, and she could see no great loyalty about it. Whatever his demoralization now, her father had been the best of fathers to her. Looking at him not as a father but as a man, she could realize, in her own womanhood, that he had been the best of husbands to her mother. She felt it was her mother's death; the inconsolable tragedy of God withdrawing his hand, which really had broken sturdy Dave MacMillan.

And Joyce was beginning to realize, as the slow months passed, that her patient battle was anything but futile. Slowly, so slowly that only she herself could see it, she was winning her struggle, she was lifting her father out of his bewildered demoralization. If only she were given another season or two, she could salvage his life.

(To Be Continued.)

Jonah and the Whale

Dramatization Of a Biblical Story Attracts London Audience

Dramatization of Biblical stories is a risky business on more than one account, but Dr. James Bridie, who has already achieved something notable in the story of Tobias and the angel, seems to now offer a Biblical play most acceptable to the discerning theatregoer. His Jonah and the whale was produced at the Westminster theatre in London, England.

The depiction on the stage of the whale's belly with the leviathan huskily addressing Jonah is one of the most curious stage pieces ever attempted in London. The delicate manner in which the whale throws up the errant, if somewhat pitiable prophet, is a masterly bit.

This follows the scene of the voyage to Tarshish in which the author seeks to convey the personnel of a passenger vessel in Jonah's day was not greatly different from that of the modern liner.

Apart from the stage effects, the play was voted a deeply interesting and brilliant piece of writing. . Its cunning satire upon the world of today was highly spoken of.

Western Canada Coal Trade

Formulating Plans To Make a Survey In the West

Preliminary inquiries in regard to the western Canadian coal trade are proceeding and the registrar of the Combines Investigation act has not yet appointed a western man to undertake a survey in the west

The preliminary inquiries are being made at Ottawa, where there is a large amount of information available in various departments of government. Long questionaires are being sent to the coal companies and the answers are being collated, in order that the combines officials may get a clearer view of the industry. When these inquiries are completed, the question of the appointment of a western commissioner to make more complete inquiries will arise.

An American film star was applying for a passport.

"Unmarried?" asked the clerk.

"Occasionally," answered the actress.

The oat king and the wheat king have been crowned at Chicago, and both of them are Canadians. The Canadian wild oat champion remains to be identified.

Denmark has less than 125,000 unemployed.

World production of rayon this year is expected to total 483,232,000 pounds.

TAKES OUT PAPERS

Our neighbors to the South will have at least one "Royal American" when Leo Constantine Tormanoff, has his final papers accepted. Otherwise known as Prince Tourmanoff of Russia, a Major-General in the Russian Army during the War, the gentleman above is now librarian in the Baker Memorial Library at Harvard University.

Story Denied By Soviets

Government Has Made No Anti-Religious Match Box Labels

A storm of protest and ridicule was evoked in Moscow by a fantastic tale of godless matches shipped to Britain in coffins, published in a London newspaper.

The London story in question alleged that "the Soviet Government now is making mockery of the figure of Christ as a trademark on a match-box" and these blasphemous boxes were being distributed in Britain, having been smuggled into the country in coffins.

No anti-religious match-box labels ever have appeared in Russia. The matches now sold carry innocent designs giving the name of the factory which produced them.

The labels, in fact, are most un-Soviet, for the most part. A few of them even have a nationalistic and religious flavor. The explanation for this, of course, lies in the fact that foreign importers of matches, including British firms, design their own labels. Some of the names among the scores used are "Fair Play," "Templevane," "Ella," "Orient," "Grape," "Elephant," "Festival."

Soviet match exports in the first nine months of 1932 amounted to 400,000 customs cases, valued at about 1,000,000 roubles. About one-third of the exports went to Britain. The total represents a sharp decline from the high mark of 1,500,000 customs cases exported in 1929-30, but a considerable increase is expected for 1933.

Kubelik's Fifty-Year Plan

Great Violinist Has Organized His Life Up To 102

The famous violinist, Jean Kubelik, is one of the world's great optimists. He celebrated his fifty-second birthday recently, but he plans to live to 102 and has organized the rest of his life in a Fifty-Year Plan.

He intends to:

Give concerts for the next thirteen years.

Compose music for the following twenty-five years.

Listen to Mozart being played for him for the remaining twelve years he expects to live.

"Even with this plan I cannot do half of what I want to do," he remarked. "I never seem to be able to compose, although it comes easily enough to me when I can settle down."

Electrical soil heating is being applied to acreage plots as an experiment in plant forcing on a large scale at the University of British Columbia.

No child should leave school until it is able at least to read the stop and go signs.

Delivery of newspapers by aeroplane has just been started in Scotland.

First Roll-Proof Liner

Italian Vessel Designed To Prevent Seasickness Sails On Maiden Voyage

The world's first roll-proof liner, designed to prevent seasickness, sailed recently from Genoa on her maiden voyage to New York. She is the 48,000-ton "Conte di Savoia," and she was built to keep an even keel in the roughest sea.

Three 100-ton rotors whirling in her hold are counted upon to keep her decks straight. When waves start the ship rolling the gyroscopes begin spinning, and this process develops a stabilising force which tends to keep the vessel on an even keel.

They are American-made gyro-stabilizers heretofore used only on warships and yachts. The Italian line spent $1,000,000 to install them.

The Beacon-Herald of Stratford, Ont., says: "Some folk say that being tossed about in rough weather does not bother them. Such statements we always accept with a grain of salt. One poet wrote "Oh the raging seas have joys for me" and they had it printed in the school books years ago. We believe it has since been discontinued, and wisely so.

If that Italian boat can make the decks quit coming up to meet the feet; if it can keep the beds from moving up and down and wobbling sideways at the next turn, then indeed will great joy be brought to thousands who feel seasick even before they go on board, and more so after they do."

Clouds Great Menace To Atlantic Flights

All Other Hazards Minimized Opinion Of "Weather Mentor"

So far has aviation conquered trans-Atlantic flying obstacles that clouds now are the greatest hazard.

With this conclusion James H. Kimball, the "weather mentor" of all trans-Atlantic flights from Lindbergh's to the present, summed up the prospects of coming Atlantic air service before the American Society of Mechanical Engineers at New York.

"Improvements in 'planes, motors and instruments," he said, "have minimized the dangers of storms and falling motors, once regarded as the twin terrors of ocean fliers. It is clouds which form the greatest hazard, for who can look with complacence on a flight that must require a long struggle in a blinding turbulent medium threatening the 'plane with ice or dismemberment?"

Scientists Are Puzzled

Skeletons Of Strange Animals Unearthed In Western States

Skeletons of strange animals that once roamed through Nebraska, South Dakota, and Wyoming 6,000,000 years ago have been unearthed by a Smithsonian Institution expedition.

According to a report just issued the fossils of the animals found include bones of three-toed horses, enormous pigs, sabre tooth cats, ancient dogs about the size of the present-day fox, miniature camels, prehistoric hawks.

The most abundant of the fossils excavated by the expedition were those of the extinct oreodents. They were pig-like mammals, that died without leaving any relatives among the present day animals.

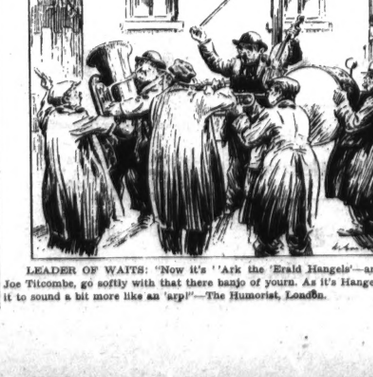

In Midst Of Plenty

Thousands Drawing Relief With Granaries Filled To Overflowing

The paradoxical situation is that there is want in the midst of plenty. We, in Canada have had an excellent crop this year. Elevators are filled to overflowing and millions of bushels of wheat are stored in granaries, yet 520,000 of Canada's 10,000,000 population apart from the 280,000 normally unemployed depend for their existence on relief payments drawn from the public treasury. And still, Canada's economic situation is not the worst by any means.—Kitchener Record.

Belfast, Ireland, is just placing automatic traffic signals in the suburbs

More than 9,000,000,000 cigarettes are smoked each month in the United States.

LEADER OF WAITS: "Now it's ''Ark the 'Erald Hangels'—an' you, Joe Titcombe, go softly with that there banjo of yours. As it's Hangels, get it to sound a bit more like an 'arp!"—The Humorist, London.

A Family Of Leaders

Lyttons Have Served Every British Monarch Since Henry IV.

Not the least interesting point about the Lytton commission's report on Japan's doings in Manchuria is the fact that a Lytton was chairman. Lord Lytton is a member of that older British aristocracy which has always accepted the responsibility and duty of public service that is applied in authority.

The Lytton family has been serving every British monarch since Henry IV.; each generation has contributed its talents, such as they have been, to the state. And in this it is no different in tradition from such other great governing families as the Cecils, the Howards, the Sackvilles, the Spencers and the Churchills.

Changes are proposed, are accepted and are finally discarded in favor of other changes. An insular nation develops into a great empire; that empire, in turn, undergoes profound changes; that empire decides to enter into an experiment in Internationalism such as the League. Always, with a consistency that is astounding, these great families continue to produce their share of leaders. It may seem a little extravagant to say so, but we suspect that were revolution to come to Great Britain a Lytton, a Sackville or a Cecil would be found as confidential adviser to the chief commissar

THE RHYMING OPTIMIST

By Aline Michaelis

LATE AFTERNOON

Eastward shades are slanting longer
On the meadows at our feet.
Now the need of rest is stronger
And the thought of rest is sweet
As the day is growing older,
Like a rose that slowly fades,
And the creeping shadows, bolder,
Mount above the quiet glades.

Slowly wanes the careless rapture
Of the heart like waning light,
And no longing can recapture
Life's first ardor, youth's delight;
But the joy of youth still lingers
As remembered roses glow,
After Time has laid chill fingers
On the garden, swathed in snow.

Though the past's triumphant legions
Now in silence must retreat,
Peace has touched these twilight regions,
Where the thought of rest is sweet.

War Spirit Exists

The World In Need Of a New Spirit Of Confidence

"What the world needs is a new spirit of understanding and confidence," said Dr. C. W. Gordon (Ralph Connor), on arrival after a visit to Europe.

"We are still living in the spirit of the war, and though there are hopeful signs that we are awakening to new ideals, we still have a long way to go."

Five weeks of his tour he spent in Geneva, where he followed the League of Nations.

"While the world awaits sensational action on the part of the league, such questions as the Sino—Japanese issue in Manchuria," he said, "the statesmen at Geneva are carefully considering and gradually coming to understand every aspect of the situation, moving gradually and diplomatically to a solution.

Dr. Gordon expressed the opinion the present system of finance is breaking down. "Money should grease the wheels of industry, not impede them," he declared.

Unless worms be expelled from the system, no child can be healthy. Mother Graves' Worm Exterminator is an excellent medicine to destroy worms.

Japan Would Abolish All Aircraft Carriers

Would Also Reduce Capital Ships To 25,000 Tons

Japan's naval disarmament plan, soon to be submitted to the disarmament conference, proposes abolition of aircraft carriers, reduction of capital ships to 24,000 tons and of their gun calibre to 14 inches, and retention of submarines.

Vice-Admiral Osami Magano, disclosed these provisions. He added that reduction in the size of cruisers and destroyers also is advocated but he would give no details. Japan also will propose prohibition of decks and platforms on capital ships from which aircraft might take off.

Looks Like Poultry War

The proposal to prohibit the importation into Canada of poultry from Australia may be in the nature of a retaliatory measures. Australia has barred North American poultry because of infectious bronchitis. British Columbia poultrymen claim Australian poultry infected with Newcastle disease.

Canada Imports Shoes

September imports of leather boots and shoes into Canada amounted to 41,607 pairs, valued at $80,959, as compared with 27,731 pairs during August and 13,872 pairs during July, according to the commerce department's shoe and leather manufacturers division.

There is NO ODOR from FISH

or from Vegetables cooked in CANAPAR

Boiled, or steamed, fish comes out firm and solid, swimming in its own juice, when you seal it up in Canapar Cookery Parchment. No fishy odor. No gummy steamer or saucepan to clean out afterwards.

And vegetables are simply delicious. Using Canapar you can cook three at once in the same pot over one burner *turned low*. Canapar acts on them as it does on fish. Retains all the mineral salts and flavor.

Fat and juices from meat won't burn if you line your roasting pan with Canapar. No pan-scraping afterwards.

Canapar only costs 25 cents for a large envelope. You can use each sheet repeatedly because it won't absorb odors. Makes a perfect dish cloth because it is silky, strong, and doesn't spread lint.

Special Offer

CANAPAR is made by the makers of the famous PARA-SANI Heavy Waxed Paper in the Green Box. Most grocers, druggists and department stores have Canapar on sale, but if yours hasn't send coupon direct to the makers and we'll give you a new and unique book entitled "Leftovers", containing one hundred recipes as a bonus for your trouble.

Applefood Paper Products, Ltd., Hamilton, Ontario.

Enclosed find 25c for which please send me one full size package of *CANAPAR COOKERY PARCHMENT* and your 100 recipes for "Leftovers".

Little Helps For This Week

"In the morning then shall ye see the glory of the Lord."—Exodus 16:7.

"Serving the Lord; rejoicing in hope."—Romans 13:11.

Every day is a fresh beginning,
Every morn is the world made new.
You who are weary of sorrow and sinning,
Here is a beautiful hope for you;
A hope for me, and a hope for you.
—Susan Coolidge.

Be patient with every one, but above all with yourself. Do not be disturbed because of your imperfections, and always rise up bravely from a fall. You can make a daily new beginning, and there is no better means of progress in the spiritual life than to be continually beginning afresh, and never to think we have done enough.—Francis De Sales.

Because perserverance is so difficult, even when supported by the grace of God, thence is the value of new beginnings. For new beginnings are the life of perseverance.—E. B. Pusey.

Abandon Submarine

British Sub M-2 Will Not Be Salvaged, Admiralty Decides

Attempt to raise the British submarine M-2, which sank off Portland race, January, 1932, with the loss of 56 lives, finally was abandoned by the admiralty after months of vain toil.

Salvage ships succeeded in getting the stern to the surface, but officials in charge decided they would not be able to bring up the bow. The M-2 will sink back to the bottom of the channel to make her grave in the mud and sand there.

Distribution Of 'Phones

British Columbia Leads All the Provinces In Use Of Telephones

British Columbians go in for telephones in a big way and lead the provinces in the use of that instrument, with 18.5 'phones for every 100 of population in 1931, says a bureau of statistics report. Ontario came next with 18.1; Manitoba and Quebec both 10.5; Alberta, 9.6; Nova Scotia, 9.1; Saskatchewan, 9.0; New Brunswick, 8.3, and Prince Edward Island, 6.6.

Persian Balm imparts a rare charm and distinction to the woman who uses it. Fragrant as a flower, deliciously cool to the skin, it always results in complexions delightfully young and lovely. Indispensable to every dainty woman. As a powder base for oily-textured skins or as a beautifying lotion, it is unrivalled. Tones and stimulates the skin. Recommended also to soften and make the hands flawlessly white.

A sturgeon weighing 401 pounds was caught recently in the Fraser River at New Westminster, British Columbia.

Night air mail service between Frankfort and Cologne, Germany, has just been inaugurated.

Six newspapers printed in modern Arabic are published in New York.

ST. ANDREW'S CHURCH

Pastor:—Rev. R. B. Layton.
L. D. Wright, G.U.E.C.C., Mus. Director
Sunday January 1, 1933
11:00 a.m. Sunday School and morning service.
Sunday, Jan. 8th
11:00 a.m. Morning Service; Observance of the Lord's Supper.
Anthem: The Living Bread, (Navin).
7:30 p.m. Evening Service.
Anthem—Hark Ten Thousand Harps are Sounding, (Stalts).
Rev. Layton will begin the first of a series of lectures on Great Religious Leaders.
Thursday evening at 8:00 p.m., there will be United Service of Prayer in the Baptist Church, led by Rev. T. H. Chapman; on Friday evening to the Anglican Church, led by Rev. R. B. Layton.
The quarterly meeting of the Official Board will be held on Tuesday evening, January 17th. Please note change in date.

LINCOLN NEWS

We are glad to see Miss M. McGeachy again in our midst and is rapidly recovering from her recent operation.
Our annual school meeting is advertised for January 7th, and the U.F.A. annual is being held on the 11th.
As demonstrated at our Xmas Tree on Thursday, the rising generation are miles ahead of their elders when it comes to a public entertainment. Several outstanding youngsters performed, but perhaps the palm must be given to Geo. Gillis, who can be equally good, whether grave or gay. The best ever, is the verdict of the enthusiastic audience who packed the hall to capacity.

ECONOMIC CRISIS SESSION THEME

Edmonton, Jan. 4—Preliminary surveys made of various provincial government departments, made on Wednesday, reveals that all are endeavoring to reduce volume of legislation to be brought down at the coming session, opening February 2, to a minimum, with only such legislation being brought down as is necessary to relieve prevailing conditions.
This, however, does not mean that the session will be unimportant. In inner circles it is regarded as being one of the most important sessions in the history of the province.
Action by the government to cope with unemployed problems and the financial situation which includes the debtor and creditor difficulties, will form as important part as at any session since the formation of the province. Questioned on the session al program, Premier Brownlee stated, "We will finally frame our legislative program so far as the budget is concerned, after we find what has transpired at the Dominion-Provincial conference opening at Ottawa on January 17.
"If this conference proves at all wide in scope, it will be bound to deal with unemployment relief, and possibly certain questions of collecting revenue, which will have an effect on provincial procedure. But I would not commit the government until we know what conditions we have to face in the next financial year.
"However, I think there will be a minimum of legislation other than in dealing with certain matters such as the debtor and creditor situation, unemployment relief and matters incidental to the budget."
Hon. George Hoadley, Minister of Agriculture and ofHealth, asked regarding possible legislation in his departments, stated there was little beyond some minor amendments to the Municipal Hospitals Act and an amendment to the Domestic Animals Act (unorganized territory) setting out more clearly the definition of a fence within the meaning of unorganized grazing area.

THE BONSPIEL

NOTICE

IN THE MATTER of the Estate of Alexander Swanson, late of the Town of Lacombe, in the Province of Alberta, deceased.
NOTICE IS HEREBY GIVEN that all persons having claims upon the Estate of the above named Alexander Swanson who died on or about the 11th day of September, are required to file with the undersigned as Solicitor for the Executors of the said deceased by the 16th day of February, A.D. 1933 a full statement duly varified of their claims and of any securities held by them and that after that date the Executors will proceed to distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been filed or which have been brought to the knowledge of their Solicitors.
DATED this 3rd day of January, A.D. 1933.
Edwin H. Jones, K.C.,
Lacombe, Alberta
Solicitor for the said Executors

NOTICE TO MILK VENDORS

All permits under the Milk and Cream By Law of the Town of Lacombe, must be renewed by January 16th. Failure to do so may result in cancellation.
DATED this 4th day of January, 1933.
L. P. MINKLER,
Secretary
